Larsen,H. Brekke,B.T. Larsen,E. Talleraas,2013-10-22 This monograph presents a unique combination of structural and tectonic modelling with applied petroleum geological problems Focussing on the Norwegian Continental Shelf and neighbouring areas it includes discussion covering all scales from development of sedimentary basins to formation of fractures and joints on a microscale and from exploration to the exploitation of hydrocarbons The book s coverage of structural and tectonic modelling petroleum geology applications and the treatment of the Norwegian Continental Shelf should make this book an invaluable resource book for advanced students of structural and tectonic modelling teachers and researchers as well as for geologists and geophysicists in the petroleum industry Fibrous Composites in Structural Design Edward M. Lenoe,2012-12-06 The Fourth Conference on Fibrous Composites in Structural Design was a successor to the First to Third Conferences on Fibrous

Composites in Flight Vehicle Design sponsored by the Air Force First and Second Conferences September 1973 and May 1974 and by NASA Third Conference November 1975 which were aimed at focusing national attention on flight vehicle applications of a new class of fiber reinforced materials the advanced composites which afforded weight savings and other advantages which had not been previously available The Fourth Conference held at San Diego California 14-17 November 1978 was the first of these conferences to be jointly sponsored by the Army Navy and Air Force together with NASA as well as being the first to give attention to non aerospace applications of fiber reinforced composites While the design technology for aerospace applications has reached a state of relative maturity other areas of application such as military bridging flywheel energy storage systems ship and surface vessel components and ground vehicle components are in an early stage of development and it was an important objective to pinpoint where careful attention to structural design was needed in such applications to achieve maximum structural performance payoff together with a high level of reliability and attractive economics

Analytical Characterization of Aluminum, Steel, and Superalloys D. Scott MacKenzie, George E. Totten, 2005-10-10 Authored by top researchers this book discusses methodologies to quantify the properties and microstructures of aluminum steel and superalloys It is a unique reference to advanced laboratory techniques in the context of characterization and property evaluation methodologies enabling the evolution of stronger and more function specific compositions Topics include metallography an atlas of microstructures thermal analysis x ray diffraction and residual stress measurement transmission electron microscopy electron backscattering diffraction spectroscopy texture measurement electron momentum spectroscopy positron annihilation spectroscopy and atomic probe tomography
