Digital Forensics and Internet of Things Anita Gehlot, Rajesh Singh, Jaskaran Singh, Neeta Raj Sharma, 2022-03-15 DIGITAL FORENSICS AND INTERNET OF THINGS. It pays to be ahead of the criminal and this book helps organizations and people to create a path to achieve this goal. The book discusses applications and challenges professionals encounter in the burgeoning field of IoT forensics. IoT forensics attempts to align its workflow to that of any forensics practice: investigators identify, interpret, preserve, analyze, and present any relevant data. As with any investigation, a timeline is constructed, and with the aid of smart devices providing data, investigators might be able to capture much more specific data points than in a traditional crime. However, collecting this data can often be a challenge as it frequently doesn't live on the device itself but rather in the provider's cloud platform. If you can get the data off the device, you'll have to employ one of a variety of methods given the diverse nature of IoT devices: hardware, software, and firmware. So while robust and insightful data is available, acquiring it is no small undertaking. Digital Forensics and Internet of Things encompasses state-of-the-art research and standards concerning IoT forensics and traditional digital forensics. Compares and contrasts IoT forensic techniques with those of traditional digital forensics standards. Identifies the driving factors of the slow maturation of IoT forensic standards and possible solutions. Applies recommended standards gathered from IoT forensic literature in hands-on experiments to test their effectiveness across multiple IoT devices. Provides educated recommendations on developing and establishing IoT forensic standards, research, and areas that merit further study. Audience: Researchers and scientists in forensic sciences, computer sciences, electronics engineering, embedded systems, information technology. 2nd International Congress of Electrical and Computer Engineering Muhammet Nuri Seyman, 2024-03-18 This proceedings presents the papers included in the 2nd International Congress of Electrical and Computer Engineering ICECENG which took place in Bandirma, Turkey, 22-25 November 2023.
