*Social and structural aspects of language contact and change* Bettina Migge,Shelome Gooden,2022-10-20 This book brings together papers that discuss social and structural aspects of language contact and language change Several papers look at the relevance of historical documents to determine the linguistic nature of early contact varieties while others investigate the specific processes of contact induced change that were involved in the emergence and development of these languages A third set of papers look at how new datasets and greater sensitivity to social issues can help to re assess persistent theoretical and empirical questions as well as help to open up new avenues of research In particular they highlight the heterogeneity of contemporary language practices and attitudes often obscured in sociolinguistic research The contributions all focus on language variation and change but investigate it from a variety of disciplinary and empirical perspectives and cover a range of linguistic contexts **Fachsprache** ,1992 The Athenaeum ,1848 *The English Encyclopædia* ,1802 **Translanguaging and Epistemological Decentring in Higher Education and Research** Heidi

Bojsen, Petra Daryai-Hansen, Anne Holmen, Karen Risager, 2023-01-13 Using data from multilingual settings in universities and adjacent learning contexts in East Asia North Africa Central and North America and Europe this book provides examples of the heuristic value of translanguaging and epistemological decentring Despite this and other theoretical and empirical work and ever stronger calls for the inclusion of other languages epistemologies and constructions of culture in higher education decentring and translanguaging practices are often relegated to the margins or suppressed in research and education because of the organisational structures of education institutions and prevailing language norms policies and ideologies The authors draw on research on pluri and multilingualism within education studies as well as post and decolonial theoretical contributions to the research on the role of language in education and knowledge production to provide evidence that decentring cannot happen until learners have been given the tools to identify which sorts of centring dynamics and conditions are salient to their learning and trans languaging

,1836      **Grammatical Categories in Linguistics and Education** Holden Härtl, Katharina Zaychenko, 2024-11-04 This volume explores how grammatical categories as defined by theoretical linguistics are effectively implemented in language education. Aiming to bridge the gap between linguistic research and language pedagogy, it offers a detailed inquiry that spans theoretical frameworks and empirical data. By presenting a series of insightful studies, this work illustrates how findings from theoretical linguistics can be applied to enhance practical language instruction, demonstrating the reciprocal enrichment of both fields. Essential for linguists, language educators, and researchers interested in the intersections of grammar, cognition, and pedagogy, the volume is organized into four engaging sections. Each section illuminates the nuances of grammar teaching and language acquisition. It begins with a theoretical analysis of linguistic categories across diverse languages, progresses through the links between linguistic research and teaching methodologies, and delves into the role of empirical data in classroom applications. The final section focuses on the practical implementation of linguistic categories in language teaching, promoting a deeper understanding of grammar as a dynamic component of language learning.      *Семантические универсалии и описание языков* Анна Вежбицкая, 2013-06-14
