## **Gaia A New Look At Life On Earth:**

**Gaia, a New Look at Life on Earth** James Lovelock, 1979 The Gaia hypothesis first put forth in the mid 1960s and published in book form in 1975 explores the idea that the life of earth functions as a single organism which actually defines and maintains conditions necessary for its survival Disclaiming the conventional belief that living matter reacts passively in the face of threats to its existence Lovelock argues that the earth s living matter air ocean and land surfaces forms a complex system which has the capacity to keep our planet a fit place for life Now reissued with an updated preface which discusses how Lovelock s predictions have already begun to hold true Gaia has dramatically altered the way scientists view evolution and the environment

**Gaia** James E. Lovelock, James Lovelock, 2000-09-28 This classic work is reissued with a new preface by the author Written for non scientists the idea is put forward that life on Earth functions as a single organism

An Analysis of James E. Lovelock's Gaia Mohammad Shamsudduha, 2017-07-05 Gaia A New Look At Life on Earth may continue to divide opinion but nobody can deny that the book offers a powerful insight into the creative thinking of its author James E Lovelock Published in 1979 Gaia offered a radically new hypothesis the Earth Lovelock argued is a living entity Together the planet and all its separate living organisms form a single self regulating body sustaining life and helping it evolve through time Lovelock sees humans as no more special than other elements of the planet railing against the once widely held belief that the good of mankind is the only thing that matters Despite being seen as radical and even idiotic on its publication a version of Lovelock s viewpoint has found resonance in contemporary debates about the environment and climate and has now broadly come to be accepted by modern thinkers As man s effects on the climate become increasingly extreme more and more elements of the Earth s self regulation seem to be unveiled forcing scientists to ask how far the planet might be able to go in order self regulate effectively Indeed despite its far fetched elements Lovelock s Gaia thesis seems to ring more convincingly today than ever before that it does is largely a result of the critical thinking skills that allowed Lovelock to produce novel explanations for existing evidence and above all to connect existing fragments of evidence together in new ways

Each converges on the ways in which humans both think about and act upon their surroundings And each radically questions the damaging conceptual divisions between nature and culture human and environment and scientific explanation and religious ethical understanding This book self consciously reflects on the intersections of environmental philosophy environmental theology and religion and ecology stressing the importance of how place interprets us and how we interpret place In addition to its contribution to environmental philosophy this work is a unique volume in its serious engagement with theology and religious studies on the issues of ecological restoration and the meaning of place      **Dazzle Gradually** Lynn Margulis,Dorion Sagan,2007      *A Feminist Companion to the Apocalypse of John* Amy-Jill Levine,Maria Mayo Robbins,2010-07-05 An examination of New Testament Apocalyptic literature through the categories of post colonial thought deconstruction ethics Roman social discourse masculinisation virginity and violence      **The State of the Earth** Paul K. **Pantheologies** Mary-Jane Rubenstein,2018-11-06 Pantheism is the idea that God and the world are identical that the creator sustainer destroyer and transformer of all things is the universe itself From a monotheistic perspective this notion is irremediably heretical since it suggests divinity might be material mutable and multiple Since the excommunication of Baruch Spinoza Western thought has therefore demonized what it calls pantheism accusing it of incoherence absurdity and with striking regularity monstrosity In this book Mary Jane Rubenstein investigates this perennial repugnance through a conceptual genealogy of pantheisms What makes pantheism monstrous at once repellent and seductive is that it scrambles the raced and gendered distinctions that Western philosophy and theology insist on drawing between activity and passivity spirit and matter animacy and inanimacy and creator and created By rejecting the fundamental difference between God and world pantheism threatens all the other oppositions that stem from it light versus darkness male versus female and humans versus every other organism If the panic over pantheism has to do with a fear of crossed boundaries and demolished hierarchies then the question becomes what a present day pantheism might disrupt and what it might reconfigure Cobbling together heterogeneous sources medieval heresies their pre and anti Socratic forebears general relativity quantum mechanics nonlinear biologies multiverse and indigenous cosmologies ecofeminism animal and vegetal studies and new and old materialisms Rubenstein assembles possible pluralist pantheisms By mobilizing this monstrous mixture of unintentional God worlds Pantheologies gives an old heresy the chance to renew our thinking *Perspectives on an Evolving Creation* Keith B. Miller,2003-09-25 According to the authors of this book who explore evolutionary theory from a clear Christian perspective the common view of conflict between evolutionary theory and Christian faith is mistaken Written by contributors representing the natural sciences philosophy theology and the history of science this thought provoking work is informed by both solid scientific knowledge and keen theological insight The three sections of the book address 1 relevant biblical historical and scientific background 2 the scientific evidence for an evolving creation and 3 theological issues commonly raised in connection with evolution including the nature of God s creative activity the meaning of the miraculous and the uniqueness of humankind Woven through the volume are short meditations designed to direct readers toward worshipping the God of providence Contributors Laurie J Braaten Warren S Brown Jr David Campbell Robin Collins Edward B Davis Terry M Gray Jeffrey K Greenberg Deborah B Haarsma Loren Haarsma James P Hurd Conrad Hyers David N Livingstone Keith B Miller John C Munday Jr George L Murphy Mark A Noll Robert John Russell Howard J Van Till David L Wilcox Jennifer Wiseman [Going for Zero](#) Carl Elefante,2025-04-24 In [Going for Zero](#) Decarbonizing the Built Environment on the Path to Our Urban Future seasoned architect and former AIA president Carl Elefante addresses how buildings and cities can and

must help resolve the looming climate emergency For architects and the countless others who work together creating human habitation the twenty first century imperatives demand a profound mode shift from an expansion mindset to one of reintegration and healing Elefante explains that revitalizing communities by optimizing existing resources makes social economic and environmental sense and directs resources where they are most needed He offers a decidedly alternative viewpoint one informed by his career rescuing buildings from demolition and learning from the practices and wisdom embedded in built heritage In *Going for Zero* Elefante offers a message of hope with the urgency to act now Fables of the Law Daniela Carpi, Marett Leiboff, 2016-10-24 The latest development concerning the metaphorical use of the fairy tale is the legal perspective The law had and has recourse to fairy tales in order to speak of the *nomos* and its subversion of the politically correct and of the various means that have been used to enforce the law Fairy tales are a fundamental tool to examine legal procedures and structures in their many failings and errors Therefore we have privileged the term fables of the law just to stress the ethical perspective they are moral parables that often speak of justice miscarried and justice sought Law and jurists are creators of fables on the view that law is born out of the facts *ex facto ius oritur* so that there is a need for narrative coherence both on the level of the case and the level of legislation or turned the other way around what does it mean if no such coherence is found This is especially of interest given the influx of all kinds of new technologies that are fabulous in themselves and hard to incorporate in traditional doctrinal schemes and thus in the construction of a new reality
