

APA (6th edition) Referencing Style

This referencing style sheet is to be used in conjunction with the Library's general Guide to Citing & Referencing. The information is based on the following manual from the American Psychological Association (APA):

American Psychological Association. (2010). *Publication manual of the American Psychological Association* (6th ed.). Washington, DC: Author.

For help with referencing items not covered in this guide:

You might like to refer to either the *Publication manual of the American Psychological Association* (6th ed.) or the more compact version, *Concise rules of APA style* (6th ed.). Both manuals are available in the Library, on Level 3, at shelf mark 808.06615 AME. You can also access the following ebook via the Library Catalogue: [The complete guide to referencing and avoiding plagiarism](#) - this includes examples for APA and other styles.

Citation

The APA uses an author-date style of referencing with details entered in round brackets, for example:

The traditional approach to human cognition is over-simplified in assuming that processing is typically serial (Eysenck & Keane, 2010).

Treatment of multiple authors: when a work has two authors, cite both authors every time. When a work has three, four or five authors, cite all authors the first time a reference occurs. In subsequent citations, include only the surname of the first author followed by et al. See:

Kisangau, Lyanuu, Hosea, and Joseph (2007) found that ... [first time cited]

Kisangau et al. (2007) found that ... [subsequent citations]

When a work has six or more authors, cite only the surname of the first author followed by et al. and the year of publication for the first and subsequent citations.

Reference list

The reference list should contain full details of all the sources mentioned in your text, arranged alphabetically by surname of first author.

Reference examples

Below are some examples of the more common types of document you might want to reference. Each gives the APA 6th ed. format for the reference, followed by an example. **Treatment of multiple authors within reference list:** when authors number eight or more, include the first six authors' names then insert three ellipses and add the last author's name. For example:

Kisangau, A., Lyanuu, B., Hosea, C., Joseph, D., Rogers, T., Tylee, C., . . . Humphreys, L. J. (2007). *Psychology*. Birmingham: ABC Press.

Nemeroff, M.D., Ph.D., 2024-03-22 More than 160 authors, including more than 75 new contributors, lent their expertise to this sixth edition of The American Psychiatric Association Publishing Textbook of Psychopharmacology. Featuring 12 all-new chapters and fully aligned with the revised DSM-5-TR classification, this two-volume text offers an unrivaled in-depth look at the rapidly evolving field of neuropsychopharmacology. The opening chapters provide a whirlwind tour of the multiple disciplines that undergird the chapters to come, with topics extending from the principles of molecular biology and genomics to the rudiments of neuroimaging and personalized medicine in psychiatry. The main body of the Textbook features an examination of the medication classes that form the basis of psychopharmacological treatment. For each drug within a class, data are reviewed on history and discovery, preclinical and clinical pharmacology, pharmacokinetic parameters, mechanism of action, indications and efficacy, side effects, and toxicology, and drug-drug interactions. The Textbook's second volume focuses on psychopharmacological approaches to treatment of patients with major psychiatric disorders, e.g., mood and anxiety disorders, schizophrenia, substance use disorders, as well as patients in specific populations, e.g., adults with ADHD, pediatric patients. For each specific condition, patient population, or setting, chapters provide guidance on topics such as medication selection, combination, and maintenance; dosing regimens; side effect monitoring and management; and optimization of treatment response. Closing this volume is an Appendix of Psychiatric Medications with key information on each of the agents covered in the Textbook, presented in a convenient tabular format. Noteworthy additions to this textbook include chapters addressing the following topics: The potential roles of personalized medicine in psychiatry and of artificial intelligence and machine learning in psychopharmacology; New medications with novel pharmacological mechanisms, including the neurosteroid antidepressant brexanolone and the atypical antipsychotic pimavanserin; Use of investigational agents such as psychedelics in psychiatric treatment; Treatment of alcohol use disorder, PTSD, OCD, and autism spectrum disorder; Treatment of ADHD in adults; Treatment of women in all life phases, including during pregnancy and the postpartum period; Treatment of individuals with intellectual developmental disorder. With a level of detail not found in any other source, this new edition of The American Psychiatric Association Publishing Textbook of Psychopharmacology illuminates the path to effective evidence-based practice.

Research Methodology and New Techniques in Analysis, Interpretation, and Writing Islam, M. Rezaul, 2018-12-07

The importance of scientific investigation and research is becoming more pronounced in today's society with many organizations relying on this research to make informed decisions. As such, research methodology courses have been integrated into undergraduate and master's programs at most academic institutions where students are being challenged to conduct and write research. *Social Research Methodology and New Techniques in Analysis Interpretation and Writing* is a pivotal reference source that provides vital research on the main concepts of research writing including the guidelines of research methodology and proposal designing. While highlighting topics such as mixed method research, research objectives, and project proposals, this publication provides examples of eight PhD proposals and the frameworks used in organizing qualitative, quantitative, and mixed method research. This book is ideally designed for graduate level students, academicians, researchers, educators, scholars, education administrators, and policymakers seeking current research on the key steps and techniques used in organizing social research proposals.

Online Counselor Education Carl J. Sheperis, R. J. Davis, 2015-12-01 *Online Counselor Education: A Guide for Students* is an all new guide for online students in counselor education programs. Students in online environments face a number of challenges that could put them at a disadvantage unless they have a resource to help guide them through some of the confusing aspects of an online environment. Such challenges include the lack of understanding surrounding graduate school performance expectations, balancing graduate school and life, the inability to connect with community members and local field agencies, and various other aspects unique to an online environment. This text from Carl J. Sheperis and R. J. Davis will help students through these challenges and act as an invaluable resource.

Research Strategies William Badke, 2017-04-05 We live in a time when there is more knowledge available to us than ever before. Yet we struggle to make sense of it. When a research deadline looms and all you see is a confusing fog of data, you know you need help. In this sixth edition of *Research Strategies*, author William Badke helps you make sense of it all. He will show you how to navigate the information fog intelligently and he will detail how to use it to your advantage to become a better researcher. Badke focuses on informational research and provides a host of tips and advice, not only for conducting research but also for everything from finding a topic to writing an outline to locating high quality relevant resources to finishing the final draft. Study guides, practice exercises, and assignments at the end of each chapter will help reinforce the lessons. As an experienced researcher who has led thousands of students to ramp up their research abilities, Badke uses humor to help you gain a better understanding of today's world of complex technological information. *Research Strategies* provides the skills and strategies to efficiently and effectively complete a research project from topic to final product.
