Lecture Notes In Entrepreneurial Finance For The Digital Economy Peter Joakim Westerholm, 2024-06-27 This book is intended to be used as a basis for developing courses in entrepreneurial finance While many universities particularly in the United States have entrepreneurial finance on their curriculum there is often a gap between the large selection of entrepreneurship courses and courses providing applicable hard skills in finance and accounting Early stage ventures cannot succeed without capital and careful management of cash flow for example Entrepreneurs need skills such as how to negotiate with investors so that they don't end up giving up the control of their venture too early This book aims to fill this gap by providing guidelines for how successful courses can be set up to train finance accounting and corporate strategy students for a career in the start up and venture capital industry

Entrepreneurship, 2023-09-27 Entrepreneurship New Insights provides a comprehensive overview of recent developments in entrepreneurship Chapters address such topics as technopreneurship immigrant entrepreneurship social entrepreneurship women entrepreneurship entrepreneurship in emerging markets and start up ventures among others

District Heating and Cooling Networks in the European Union Antonio Colmenar-Santos, David Borge-Díez, Enrique Rosales-Asensio, 2017-07-18 This book evaluates the potential of the combined use of district heating networks and cogeneration in the European Union EU It also proposes measures to remove barriers hindering their widespread implementation formulates policies for their implementation and evaluates their economic energy and environmental consequences The book presents a preliminary assessment of the likely cost and the impact of widespread adoption of district heating networks and cogeneration carried out in three cities that represent the variety of climatic conditions in the EU Based on this assessment it is estimated that by undertaking the maximum economically feasible implementation across the EU fuel savings of 95M year would be achieved representing energy savings of 6 400 petajoules PJ which is around 15% of the total final energy consumption in the EU in 2013 46 214 5 PJ Using simple and quick calculations and not specific software the method used allows the evaluation of the potential benefits of retrofitting existing power plants into cogeneration plants and connecting them to nearby heating networks In light of increasing energy costs and environmental concerns the book is of interest to heating engineers city planners and policy makers around the globe
