Entrepreneurship And Business Management Authorstream:

Innovation, Entrepreneurship and Organizations' Business Performance Milena Ratajczak-Mrozek, Tibor Mandjak, 2018

If there are concepts that have huge academic literature and are of outstanding practical significance in corporate practice then business performance is certainly one of them. However, the authors of this special issue add interesting and exciting elements to our knowledge regarding business success and performance in many ways. This special issue underlines that business success, which has both financial and social components, depends to a great extent on the knowledge, skills, and cooperative skills of people in the organization and their openness to the world of external and internal stakeholders. The behavior of people when heavily influenced by the values of the organization and its associated business ethics has a major impact on business success. This is also true for ethically and socially controversial industries such as pharmaceutical, alcohol, and tobacco. The research results of the authors in this special issue show that different organizational frameworks and solutions can lead to the success of a business. There is, of course, no single infallible recipe leading to success. However, developing project management skills and applying a project management approach within an organization can increase the organization's entrepreneurial ability. The key feature of such a solution is that the organization becomes more open to stakeholders and processes in its local environment. This also means that an organization's ability to innovate and improve the efficiency of its innovation processes increases. It is an exciting feature of the special issue that most of the studies deal with a specific area of the global economy, namely Central and Eastern Europe. Empirical research carried out in Poland, the Czech Republic, and Hungary, and a comparative analysis of them, is a valuable contribution to the increasingly rich literature dealing with this region as well as the academic literature in the more general sense.

The first paper by Majra Hodi and Helena Hrzovcova. A study of project management practices in the Czech Republic addresses the importance of project management for organizations' innovation and performance. Based on the example of the Czech Republic, Hodi and Hrzovcova study current practices used in the field of project management and underline the importance of stakeholders' main demands and requests and the level of use of project management methods. The results that are presented provide practical implications, especially for new start-ups wanting to boost their competitiveness and innovativeness by displaying success factors for project management and the necessity for innovation in this area. The subject of project management is continued in the second paper by Katarzyna Grzesik and Katarzyna Piwowar-Sulej, entitled "Project managers' competencies and leadership styles from the perspective of organizations functioning in Poland." Grzesik and Piwowar-Sulej discuss the significance of project managers' different competencies and project leadership styles, which are especially important nowadays considering the increasing dynamics of the organizations' environment. The needed and adopted competences are compared between the strictly project-oriented organizations implementing projects for external clients and organizations that manage projects for internal purposes. The authors identify competencies which are important for organizations' success in the area of project management and may

in turn lead to better business performance. The importance of human capital for organizations' performance and competitive advantage is addressed in the third paper by Ukasz Bryl called Human capital orientation and financial performance: A comparative analysis of US corporations. In the paper, Bryl verifies whether human capital oriented organizations generate a positive or even above average financial performance due to higher skills of employees, greater motivation and thus higher overall effectiveness. The paper has significant practical implications for both managers aiming at increased competitive advantage and investors in terms of the possible directions of stock market investments aimed at achieving above average returns. Financial success and high performance may also be gained by innovativeness. In the fourth paper, An innovation capability development process for firms in developing countries: A theoretical conceptual model, Gezahegn Tesfaye and Daniel Kitaw analyze the problem of innovation capability development. The much needed complexity of the analysis is reflected by combining both the technical and the financial aspects of innovation capability development. The proposed model identifies three key innovation capability constructs and is of practical value especially to organizations from developing countries as it helps to progress the innovation capabilities more effectively. The fifth paper by Włodzimierz Sroka and Richard Szant, CSR and business ethics in controversial sectors: analysis of research results, addresses the issue of organizations' performance from a different perspective, namely the particular obligations toward society or the environment constituted by corporate social responsibility. Based on the example of controversial sectors of the economy: pharmaceutical, tobacco and alcohol, Sroka and Szant examine the scale and scope of the use of business ethics principles and practices in Poland and Hungary. The analysis provides not only significant fresh insights in this field but also shows that business ethics have an influence on business success and the corporate image of organizations. The sixth paper, The themes of entrepreneurship discourse: A data analytics approach, by Philip T. Roundy and Arben Asllani, considers the importance of the language used by entrepreneurs. Roundy and Asllani identify five dominant themes in entrepreneurship discourse which address among other things technology and professional investments. The analysis of the most recurring themes in entrepreneurship discourse and their change over time sets directions for future research and indicates the importance of entrepreneurship discourse for organizations' business success. We would like to thank all the authors for their contribution to this special issue and for sharing their research. We believe that this new research represents a valuable input to our knowledge regarding business success and organizations' performance. We also want to thank the reviewers whose comments contributed to the improvement of the papers and the whole of this special issue. We hope the articles presented here will be of interest to readers, scholars and researchers around the world and that they will inspire them on to further scientific and practical research in the field of business performance.

Principles and Practices of Management and Business Communication Anupam Karmakar, Legal-Economic Institutions, Entrepreneurship, and Management Nezameddin Faghieh, Ali Hussein Samadi, 2021-04-07. The study of dynamics of institutional change in emerging markets are subjects of great interest in contemporary political economy. The dynamics

and quality of institutional change can have significant impacts on the long run performance of economies economic growth and development of nations and play a fundamental role in societies It provides a comprehensive understanding of legal economic institutions and sheds light on the way to global peace by producing a better understanding of the dynamics of historical change Topics range from institutional uncertainty hybrid market order and labor market institutions to good governance of institutions and WTO rules as trade institutions as well as entrepreneurship and institutional change in emerging markets and the role of modern technologies This edited volume emphasizes legal economic institutions and the role of management and entrepreneurship on dynamics trends and implications of institutional change in emerging markets Presenting research articles by eminent scholars and experts engaged in education and research who address and discuss the most recent issues in the field they reveal new insights into the dynamics of institutional change for researchers interested in development of new theories and comparative studies especially in the era of emerging markets The book is appealing to a wide range of global audience can serve as a useful reference work in education and research offers innovative and productive discussions and can satisfy scholarly and intellectual interests regarding institutional development and a broad spectrum of its interactions with functioning of markets and economies Management and Entrepreneurship N. V. R. Naidu,2013-12-30 This book is intended to serve as a textbook for Engineering and Management courses It seeks to develop an understanding of the concepts of management and entrepreneurship The chapters are well planned to cover basic functions of management and entrepreneurship small scale industry institutional support and project preparation Salient Features Comprehensive and easy to understand requires no previous knowledge of the subject Presented in a simple and systematic manner Review questions for the benefit of students *Digital Entrepreneurship* Nezameddin Faghih,2024-05-24 Focusing on emerging features of digital transformation digital economy digital innovation and digital entrepreneurship this edited volume highlights new aspects of digital transformation and research progress in the field Chapters cover a wide range of topics such as promoting the growth of the digital economy through the alertness of entrepreneurs predicting entrepreneurial performance through the lens of entrepreneurial orientation and digital adoption with a machine learning approach proposing a guide to emphasize the key aspects of social media analytics examining the digital pathology ecosystem and key drivers for investment in more efficient disease diagnosis and monitoring exploring how humane orientation contributes to the intention to use digital entrepreneurship with a gender perspective Concluding with a review of the extant digital economy literature the volume proposes a future research agenda which will be useful not only for researchers and academics but also for entrepreneurs and policymakers *Entrepreneurship and Creativity in the Metaverse* Inder, Shivani,Min, Byoung-chul,Sharma, Sandhir,2024-03-05 The Metaverse an expanding digital space is at the forefront of a technological revolution that will redefine how we interact with the digital world Yet as this fascinating landscape evolves it presents an array of complex challenges particularly in the realm of entrepreneurship The current

literature on Metaverse entrepreneurship is notably lacking leaving a void in our understanding of the Metaverse's potential and the role of entrepreneurs within it. Critical questions about the emergence of entrepreneurial ecosystems, the evolution of entrepreneurship frontiers, and the impact of innovation and creativity within the Metaverse remain largely unanswered. Entrepreneurship and Creativity in the Metaverse serves as a guide to comprehending and harnessing the Metaverse's vast potential. As a space with fewer limitations than the physical world, creativity and entrepreneurship have immense potential to flourish within the Metaverse. It provides a much-needed roadmap for scholars, entrepreneurs, educators, industry experts, and policymakers to navigate this uncharted territory and thrive within it.

Business Process Management: Current Applications and the Challenges of Adoption Renata Gabryelczyk, Tomislav Hernaus, 2020-01-01

Business Process Management (BPM) has been evolving for over 25 years in information systems research, management science, and organizational practice. Vom Brocke and Mendling (2018) identified the earliest characteristics of BPM concentrated around process analysis, improvement, and control in a less strict manner that required reengineering. Elzinga, Horak, Lee, and Bruner (1995) observed that more mature approaches since the year 2000 have been promoting the so-called process thinking, i.e., managing an organization from a process-based point of view. These approaches emphasize that process and team work-oriented organizational structures should be aligned with other management systems. Process management should be holistic by its nature so as to cover an entire organization. Although BPM researchers stressed the need for system thinking at that time, published literature distinguished two perspectives of looking at BPM: the organizational perspective and the technological perspective. From the organizational perspective, authors focused on a number of key factors, i.e., process governance, a process-based organizational structure, customer orientation of internal and external processes, managing an organization based on process outputs, building process relations, and improving process maturity throughout the customer value chain, as well as through strategically aligning process initiatives to organizational objectives. From the technological perspective, the key factors of interest to authors referred to as BPMS (Business Process Management System) include IT methods, techniques, and tools that support the designing, implementation, modeling, and simulation of business processes and are considered to be an extension of classical workflow systems or an environment for designing management support IT systems, e.g., ERP class systems. An integrated and interdisciplinary approach was proposed in the framework of six core BPM elements required for the holistic and sustainable use of process

management Rosemann Vom Brocke 2010 These include strategic alignment governance methods information technology people and culture In this sense technology is only one of six closely interrelated elements Currently there are two distinct directions in the evolution of BPM traditional BPM and digital BPM The former encompasses methods techniques and systems that traditionally lead to increased organizational efficiency and to improved process effectiveness and flexibility Although studies on BPM have been continuously evolving some research gaps still remain open The traditional understanding of process management seems particularly vital to organizations in developing economies which sometimes follow practices and models that were designed and tested in highly developed countries but should also be committed to drawing on their own experience and understanding of their local business environment Gabryelczyk Roztock 2018 Research on BPM in this traditional focus is still needed to better document implement and improve idiosyncratic business processes in the context of an organization environment culture and country This is also confirmed by research conducted under the JEMI Special Issue on Business Process Management Besides the traditionally shaped approach to BPM organizations increasingly treat BPM as a driver of organizational innovation and as an essential part of the digital transformation Vom Brocke Schmiedel 2015 New digital technologies such as social media digital platforms big data and advanced data analytics blockchains robotics etc enable development and growth in a constantly changing environment To take advantage of these opportunities in the digital world organizations require new BPM competences and capabilities However digital disruption creates quite a challenge for the BPM research community How can BPM capabilities be developed in order to achieve adaptability growth flexibility and agility How can BPM foster innovations within and throughout organizations These are just some of the issues for future BPM related research Threads associated with employing BPM for digital transformation have been included in a proposed Special Issue on BPM This Special Issue on BPM consists of six articles including contributions from invited authors from three transition economies Croatia Slovakia and Poland All of the papers focus on applications of the process approach to management or directly to the adoption of Business Process Management The majority of articles relate to the traditional BPM thread although the indicated BPM alliances with other concepts such as Knowledge Management Change Management and Project Management are worthy of note Only one article addresses the topic of BPM in the context of digital transformation The nature and structure of these articles may be indicative of the current motivational factors and process maturity levels of organizations adopting ordinary and or advanced BPM practices When analyzing the content of individual articles we pay attention to the factors underlying BPM adoption We understand the primary motivation to be the expected benefits from BPM Therefore we can assume this Special Issue to be a contribution to BPM development in the form of the indicating motivation and triggers for BPM adoption The first paper by Jerzy Aukstol and Magdalena Chomusko proposes a process based approach to construct a Data Control Framework for Standard Audit File for Tax SAF T The process approach is used to redesign the internal financial control processes and procedures of an

organization to meet the new requirements of a fiscal audit The process approach combined with risk management and quality management is therefore a tool supporting entrepreneurs adapting to new regulations imposed on them by their external environment particularly those of tax authorities Therefore in this case the main motivation for adopting elements of BPM was the impact of external environment factors The paper by Ana Marija Stjepi Lucija Ivan i and Dalia Su a Vugec focuses on the link between Business Process Management and digital transformation The authors have developed a theoretical framework for the emerging role of BPM in digitalization and as a guide for researchers and practitioners conducting digital transformation initiatives in organizations The results obtained in the article prove that the set goals and expected benefits of digital transformation can be achieved by a rethink and improvement of the processes with a particular focus on end to end customer processes through supply chain management Based on this article we can conclude that one of the main motivational factors for BPM adoption is a desire to obtain the benefits of digital transformation The article written by Miroslava Nyul sziov and Dana Pa ov takes up the issues of using and linking the process approach and BPM lifecycle with the designing of decision support systems The authors of this paper have developed an innovative system for decision support by implementing modeling analysis and improvement methods to the transportation process in the studied organization The forwarding company s case study presented in the paper also shows how BPM adoption began with a single main process that has been streamlined and automated Therefore the motivations for BPM adoption were not only operational relating to the optimization of the cost of the process but also managerial oriented on improving the decision making process The use of information technology allowed the full exploitation of the potential for process improvements The next paper by Olga Sobolewska is about incorporating the issues of BPM into the contemporary challenges of network organizations The author claims that the organization s orientation towards both business processes and knowledge management is a strong success factor for network cooperation The author argues that modern organizations should focus on managing knowledge oriented processes to become attractive to cooperation partners for network organizations In this article BPM adoption is of a strategic nature for the purposes of undertaking new forms of cooperation The paper by Hubert Bogumi has an interdisciplinary character and in a unique way shows the connections between the concepts of process management organizational change management and IT project management The author undertook the challenge of examining how problems for organizations managing IT projects facilitate in different ways the use of distinctive approaches to improve business processes The author emphasizes that the main difficulty is the fact that modern organizations most often use a hybrid approach with elements of both traditional project management and agile The need to create a work environment that takes into account the risk of unexpected system and business regression as well as a diagnosis of the causes and methods of its mitigation is the initial research result in this paper This article contributes to the development of BPM governance and integration of IT governance The motivational factors for BPM are multi faceted as is the scope of the

article However their managerial and cultural character related to methods of communication and rules of cooperation in teams should be emphasized The article by Agnieszka Bitkowska concerns the integration of the concept of Knowledge Management and BPM The author restates in her article that the identification acquisition presentation and documentation of knowledge are not independent tasks but are implemented within business processes In this paper the correlations between BPM and Knowledge Management have been examined and the benefits and practical implications resulting from the integrated implementation of both concepts are emphasized In the case of this article BPM adoption can be a success factor for the implementation of Knowledge Management and the achievement of associated benefits Studying Business Process Management from the different angles presented in this Special Issue should enrich our understanding of current BPM practices and better realize future challenges especially those related to BPM development in the context of digital transformation and the integration of BPM with other management related concepts In addition the contribution made by the authors of this Special Issue allowed us to see various motivations and triggers for BPM adoption from operational to managerial strategic cultural and technological ones and those driven by the external environment We would like to thank the authors for their contribution to this Special Issue We would also like to thank all the reviewers for their valuable comments which helped the authors improve their articles significantly We are firmly convinced that the BPM research results presented in this Special Issue will help strengthen the existing body of BPM knowledge We recommend reading the related issue of the JEMI journal to the wider community of BPM researchers practitioners and enthusiasts Guest Editors Renata Gabryelczyk Tomislav Hernaus Acknowledgments The editorial work on this Special Issue was supported by the Polish National Science Centre Poland Grant No 2017 27 B HS4 01734 References Elzinga D J Horak T Lee C Y Bruner C 1995 Business process management Survey and methodology IEEE Transactions on Engineering Management 42 2 119 128 [http dx doi org 10 1109 17 387274](http://dx.doi.org/10.1109/17.387274) Gabryelczyk R Roztocki N 2018 Business process management success framework for transition economies Information Systems Management 35 3 234 253 [http dx doi org 10 1080 10580530 2018 1477299](http://dx.doi.org/10.1080/10580530.2018.1477299) Rosemann M Vom Brocke J 2010 The six core elements of business process management In Handbook on Business Process Management 1 Cham Springer Vom Brocke J Mendling J Eds 2018 Business Process Management Cases Digital Innovation and Business Transformation in Practice Berlin Springer Vom Brocke J Schmiedel T Eds 2015 BPM Driving Innovation in a Digital World Cham Springer *Islamic Business Administration* Minwir Al-Shammari, Mohammad Omar Farooq, Hatem Masri, 2020-03-13 This essential textbook provides a comprehensive introduction to the Islamic business environment exploring core concepts and practices in business administration from an Islamic perspective Thorough and accessible it covers the full range of Islamic business including entrepreneurship ethics organizational culture marketing finance and decision making Taking an integrated approach that aligns contemporary business practice with traditional Islamic literature the book offers an engaging exploration of the key ways in which

business activities can be organised to align with Islamic norms rules and regulation Developed from the teaching practice of an international range of leading scholars in the field Islamic Business Administration includes topical case studies practical business scenarios and comparative features encouraging students to place their understanding of Islamic business within the wider global business context and to understand its practical implementation This is an invaluable companion for students studying a module in Islamic business or management at undergraduate postgraduate and MBA level It is also suitable for students of Islamic finance or banking looking to place their learning in the wider context of Islamic business

Managing Engineering Processes in Large Infrastructure Projects Pascal Bohulu Mabelo, 2021-10-11 Project managers are often scolded and crucified for the massive overruns plaguing their megaprojects While some project managers may deserve the blame a closer look would reveal that many competent ones are bearing the brunt of the failure not of Project Management as such but of Engineering Management Project management experts would eventually concede that once the engineering team loses control over the technical content you can no longer control the time or money spent on it Engineering mistakes and other design discrepancies always breed overruns in projects and poor performance in subsequent operations because those design errors will cause difficulties during construction and engender recurring malfunctions in operations No cost and schedule management tools or weekly status reports can prevent or remedy those situations Therefore proceeding from the Systems Thinking approach this book discusses the causes of and explores methods that address such insidious predicaments It examines topics ranging from stakeholders needs and requirements to how they ought to be translated into functions so that they may be performed by the systems under development Design and development processes and methods as well as their generic outputs and respective lifecycle implications are also discussed based on practical real life examples

Business Ethics and Leadership from an Eastern European, Transdisciplinary Context Sebastian Vaduva, Ioan S. Fotea, Andrew R. Thomas, 2016-11-25 This book aims to provide insight into the fields of business and leadership by examining the role of ethics in these areas The papers in this book derive from the 2014 Annual Griffiths School of Management International Conference organized by Emanuel University of Oradea Romania where academics and practitioners interacted and discussed current insights and research in the different dimensions of business ethics and leadership This resulting book offers empirical and theological research on ethics business and leadership from a transdisciplinary and knowledge based context Since the financial crisis in 2008 the debate on business ethics and leadership has dominated the public sphere at all levels of interest from grassroots to the elites in educational institutions governments businesses and NGOs Naturally constructive and transdisciplinary discussions need to take place with due consideration for the specific context of each situation so that propositions upon which to build the future can be formulated These discussions unfold in an ever more intricate world of business powered by ever more pervasive and intelligent technology and scientific development all brought together by globalization In this world organizations are faced

with new and more complex ethical issues in their pursuit to serve clients gain profits motivate employees collaborate with partners and act responsibly towards society and the environment A wise approach to changing the future is to understand the mistakes of the past because one must always learn how to overcome past mistakes in order to develop a better future But a necessary approach to building a better future is looking at the world through a transdisciplinary mindset This allows us to see the world as a complex whole it fosters creative interaction between fields of knowledge it opens doors for knowledge and innovation flows across disciplines and it allows the tackling of complex problems and situations Given the current context of our world this is an approach that we ought to pursue Featuring contributions from academics researchers scholars and practitioners from across the globe this book will be of great interest for students and practitioners in the fields of business leadership and ethics

Eurasian Business Perspectives Mehmet Huseyin Bilgin, Hakan Danis, Ender Demir, Ugur Can, 2019-04-03 This volume of Eurasian Studies in Business and Economics includes selected papers from the 22nd Eurasia Business and Economics Society EBES Conference in Rome It presents original empirical research from several countries and regions including many developing economies such as Poland Russia Tunisia Lebanon Belarus and Lithuania Both the theoretical and empirical papers in this volume cover diverse areas of business and management from various regions The main focus is on sharing the latest research results on evolving approaches to entrepreneurship research behavioral aspects of entrepreneurship and SME development and policy development The volume also includes related studies that analyze international business cooperation performance assessment and a range of other current topics

Recognizing Women's Leadership Tiffani Lennon, 2014-08-26 According to recent data on women leaders across all major sectors in the United States women are outperforming men but earning less and still hitting the glass ceiling This book uncovers the best practices to remedy these inequities optimize performance and benefit both genders In compiling and analyzing 2011 2012 data on women leaders across all major sectors in the United States author Tiffani Lennon JD uncovered proof that women are outperforming men yet salaries and positional leadership roles are disproportionate to the performance and accomplishments of women in nearly all sectors Recognizing Women's Leadership Strategies and Best Practices for Employing Excellence presents a comprehensive look at agencies and organizations with the smallest pay gap and the largest percentage of female positional leaders to reveal best practices and strategies that ensure gender parity and optimal business performance including impact revenue and efficacy The study examined in this book included approximately 1 500 for profit companies not for profit businesses and other organizations and associations throughout the country to establish the number of women leaders among the top echelon in each industry Researchers also calculated leadership performance by identifying the frequency with which women received industry distinctions and awards were top revenue generators and achieved best sellers list status among other sector specific criteria The ramifications of the study's findings portend the future of the United States as a global competitor and as such need to be part of the public discourse surrounding the state of the

American economy **De Gruyter Handbook of Business Families** Michael Carney, Marleen Dieleman, 2023-01-30 The management field increasingly recognizes that most firms in the world are family firms and that these entities operate differently from the non family firms on which most of our current management theories are based The De Gruyter Handbook of Business Families brings together work from leading academics who explore emerging research themes relevant to business families particularly drawing in new insights from adjacent disciplines that can advance the family business field The handbook challenges the traditional notion of the single firm single family that has characterized most early research on family business Recognizing that families may simultaneously own or control multiple businesses as well as substantial wealth beyond these firms in the form of financial and non financial assets this handbook focuses on business families rather than the narrower construct of family business The contributions in this handbook explore the relatively neglected dynamics between individuals with family ties that shape the interaction between family and business business families with multiple businesses how business families adopt formal rules and processes around their joint activities and the institutionalization of wealth and business families in society The De Gruyter Handbook of Business Families fills a gap in the family business research literature and is an essential reference work for researchers and graduate level students in the area of business families

Spirituality Management in the Workplace Fahri Özsungur, Fevziye Bekar, 2023-12-14 The experts here provide conceptual frameworks and guidance by examining the subject in the light of current developments at multiple levels of analysis individual organizational cultural and in leadership Spirituality in the workplace considers employees as a whole in spirit body and mind

Creative Concert Production and Entrepreneurship Andreas Sonning, 2024-04-18 Creative Concert Production and Entrepreneurship Concert Dramaturgy and Project Development for the Performing Arts offers a conceptual and applied introduction to the musical and dramaturgical challenges involved in developing and producing concerts Drawing from over three decades of real world experience and a range of international case studies the author explores new models for cooperation between artists cultural institutions governments and businesses arguing for the importance of rooting the concert production process in artistic and ethical values The book presents essential knowledge and techniques to meet the demand for music and stage performances across genres arenas formats and distribution channels Relevant to a wide range of students and professionals in music and the performing arts Creative Concert Production and Entrepreneurship marries theory with practice providing a framework for readers to develop the creative entrepreneurial practices essential for success in today s music industry

Early Childhood Education Management Mary Moloney, Jan Pettersen, 2016-09-19 The Early Childhood Education sector around the world is constantly changing whether because of the unprecedented demand for ECE services globally accelerated social change or the introduction of pedagogical and regulatory practices Based upon empirical inquiry Early Childhood Education Management examines the somewhat controversial concept of operating an early childhood service as a business It challenges the assumption that an

early childhood manager does not require specialist knowledge or skill and discusses which attributes an effective manager should possess In this book which brings together management theory and practice Moloney and Pettersen address core issues at the heart of the management role including the relationship between early childhood policy and broader legislative enactments as well as issues related to the challenges and development of management skills The book also draws upon real life examples from practice in order to offer insight into some of the most common topics and challenges related to management practice in Early Childhood Education such as business acumen and entrepreneurship recruitment and selection financial management and budgeting supervision mentoring staff development curriculum management collaborative working and change management Written by leading academics with practice experience the book should be of great interest to researchers academics and postgraduate students in the field of education specifically those working in early years and education policy and management It should also be essential reading for managers working in Early Childhood settings

Innovative Unternehmen der Sozial- und Gesundheitswirtschaft Berthold Becher, Ingrid Hastedt, 2018-10-12 Unternehmen in der Sozial und Gesundheitswirtschaft die auch angesichts der Entwicklung ihrer Rahmenbedingungen nachhaltig erfolgreich sein wollen müssen sich auf neue Art mit Innovation auseinandersetzen Dieser Band zeigt die Gründe hierfür auf und informiert handlungsrelevant über die von den Unternehmen zu schaffenden strategischen organisatorischen personellen und finanziellen Voraussetzungen zur Steigerung der Innovationsfähigkeit und der Innovationskraft Ergänzend verdeutlichen Praxisberichte wie vielfältig die Absatzpunkte für Innovationen geworden sind und welche Erfahrungen mit Umsetzungsprozessen Unternehmen machen konnten

Optimum Decision Making in Asset Management Carnero, María Carmen, González-Prida, Vicente, 2016-08-24 Asset management is becoming increasingly important to an organization's strategy given its effects on cost production and quality No matter the sector important decisions are made based on techniques and theories that are thought to optimize results asset management models and techniques could help maximize effectiveness while reducing risk Optimum Decision Making in Asset Management posits that effective decision making can be augmented by asset management based on mathematical techniques and models Resolving the problems associated with minimizing uncertainty this publication outlines a myriad of methodologies procedures case studies and management tools that can help any organization achieve world class maintenance This book is ideal for managers manufacturing engineers programmers academics and advanced management students

The New Generation Z in Asia Elodie Gentina, Emma Parry, 2020-10-23 The New Generation Z in Asia Dynamics Differences Digitalization is the first book to compare the Asiatic Generation Z born 1990-1995 in terms of country and culture specific drivers and characteristics based on interdisciplinary and international scientific research

The Top Books of the Year Entrepreneurship And Business Management Authorstream The year 2023 has witnessed a remarkable surge in literary brilliance, with numerous compelling novels captivating the hearts of readers worldwide. Lets delve into the realm of bestselling books, exploring the fascinating narratives that have captivated audiences this year.

Entrepreneurship And Business Management Authorstream : Colleen Hoover's "It Ends with Us" This touching tale of love, loss, and resilience has captivated readers with its raw and emotional exploration of domestic abuse. Hoover expertly weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can prevail.

Uncover the Best : Taylor Jenkins Reid's "The Seven Husbands of Evelyn Hugo" This captivating historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reid's absorbing storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery.

Discover the Magic : Delia Owens' "Where the Crawdads Sing" This captivating coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens weaves a tale of resilience, survival, and the transformative power of nature, captivating readers with its evocative prose and mesmerizing setting.

These bestselling novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of compelling stories waiting to be discovered.

The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts.

The Secret History is a masterful and thrilling novel that will keep you speculating until the very end. The novel is a cautionary tale about the dangers of obsession and the power of evil.
