expression of apocalypse in particular in anglophone science fiction of the nineteenth and twentieth centuries Approaching these works from historical philosophical linguistic and literary perspectives the contributors examine the relationship between secular and spiritual apocalypse connecting the fiction and films to their historical moment Not surprisingly war recurs throughout this material as a critical turning point fulfilment of prophecy or prelude to a new age In particular the essays explore the issue of whether modern apocalypse is seen as an ending or a beginning considered under its political ethnic and gendered aspects Among the writers covered are H G Wells Olaf Stapledon and such contemporary figures as Michael Moorcock J G Ballard and Storm Constantine

The Publishers Weekly, 1995 *Pi (π) in Nature, Art, and Culture* Marcel Danesi, 2020-12-07 In *Pi in Nature Art and Culture* Marcel Danesi revisits the importance of π as a pattern in the structure of reality fitting in with the Pythagorean view of Order π has cropped up in formulas that describe natural and physical structures which on the surface seem to have nothing to do with a circle but might harbor the archetype of circularity as a principle Through this book thus revisits the implicit ancient Greek view that geometry was a hermeneutic science a discipline aiming to investigate the connectivity among numbers shapes and natural phenomena It also examines its manifestations in aesthetic symbolic and cultural structures which point to an abiding fascination with the circle as an unconscious archetype Hermeneutic geometry is ultimately about the exploration of the meanings of geometric mathematical notions to science and human life
