Estimated Cost Of Production For Legalized Cannabis:

Legalizing Cannabis Tom Decorte, Simon Lenton, Chris Wilkins, 2020-02-20 Marijuana is the most widely used illegal drug in the world. Over the past couple of decades, several Western jurisdictions have seen reforms in or changes to the way cannabis use is being controlled, departing from traditional approaches of criminal prohibition that have dominated cannabis use control regimes for most of the twentieth century. While reform is stalled at the international level, the last decade has seen an acceleration of legislative and regulatory reforms at the local and national levels, with countries no longer willing to bear the human and financial costs of prohibitive policies. Furthermore, legalization models have been implemented in US states, Canada, and Uruguay and are being debated in a number of other countries. These models are providing the world with unique pilot programs from which to study and learn. This book assembles an international who's who of cannabis scholars who bring together the best available evidence and expertise to address questions such as: How should we evaluate the models of cannabis legalization as they have been implemented in several jurisdictions in the past few years? Which scenarios for future cannabis legalization have been developed elsewhere, and how similar/different are they from the models already implemented? What lessons from the successes and failures experienced with the regulation of other psychoactive substances, such as alcohol, tobacco, pharmaceuticals, and legal highs, can be translated to the effective regulation of cannabis markets? *Legalizing Cannabis* will appeal to anyone interested in public health policies and drug policy reform and offers relevant insights for stakeholders in any other country where academic, societal, or political evaluations of current cannabis policies and even broader current drug policies are a subject of debate.

Can Legal Weed Win? DR. ROBIN. SUMNER GOLDSTEIN (PROF. DANIEL.), Robin Goldstein, Daniel Sumner, 2023-09-19 Two economists take readers on a tour of the economics of legal and illegal weed, showing where cannabis regulation has gone wrong and how it could do better. Cannabis legalization hasn't lived up to the hype. Across North America, investors are reeling, tax collections are below projections, and people are pointing fingers. On the business side, companies have shut down, farms have failed, workers have lost their jobs, and consumers face high prices. Why has legal weed failed to deliver on many of its promises? *Can Legal Weed Win?* takes on the euphoric claims with straight dope and a full dose of economic reality. This book delivers the unadulterated facts about the new legal segment of one of the world's oldest industries. In witty, accessible prose, economists Robin Goldstein and Daniel Sumner take readers on a whirlwind tour of the economic past, present, and future of legal and illegal weed. Drawing upon reams of data and their own experience working with California cannabis regulators since 2016, Goldstein and Sumner explain why many cannabis businesses and some aspects of legalization fail to measure up, while others occasionally get it right. Their stories stretch from before America's first medical weed dispensaries opened in 1996 through the short-term boom in legal consumption that happened during COVID-19 lockdowns. *Can Legal Weed Win?* is packed with unexpected insights about how cannabis markets can thrive, how regulators get the laws right or wrong, and what might happen to legal
