process of managing orders begins with inventory data. "Being able to unify a view of inventory and then syndicating that inventory data out across a range of different channels lets you improve the customer experience," Cairns comments.

explains, "It's about making inventory data available to other systems, like search, as well and ultimately being able to personalise search results based on inventory." With changing customer preferences in recent years,

brands have had to adapt quickly. As Cairns explains, Fluent Order Management not only provides a robust software-as-a-service platform, but at a lower total cost so businesses can move quickly and meet customer expectations efficiently.

During the COVID-19 pandemic when stores were closed, Fluent Order Management enabled businesses to adapt quickly. "Stores still had inventory and there were huge spikes in online demand," Cairns explains. "Our customers were able to adapt in a matter of a day to completely change their fulfilment workflow."

"Digital agility is essential," he concludes. "We are not trying to predict what the future is, but to provide a toolset that allows you to adapt as the future evolves."
