whiteness masculinity heterosexuality ability and even those associated with American ideals of self reliance the good life and the self made man Teaching practices around these texts may also reinforce harmful practices and ways of thinking including those connected to notions of culture literary merit and methods of reading teaching and learning Teaching the Canon in 21st Century Classrooms offers innovative critical ways of reading thinking about and teaching canonical texts in 21st century classrooms Responding to the increasingly pluralized digitized global 21st century English classroom chapter authors make explicit the ideologies of a canonical text of focus while also elaborating a pedagogical approach that de centers the canon bridges past and present applies critical theory and celebrates the rich identities of 21st century readers In using this book teachers will be especially poised to take on the canon in their classroom and thus to open up their curricula to ideas values concerns and narratives beyond those embedded in the canonical texts

Learning Space Jeremy Delamarter, 2025-01-13 As a genre science fiction is uniquely suited for highlighting and modeling the basic tenets of critical pedagogy that branch of educational philosophy and theory devoted equally to 1 exposing the hidden power structures embedded in educational practice and 2 articulating equitable and sustainable alternatives The science fiction novum that is the technological or scientific newness found within the text serves as a catalyst not only within the textual universe but also potentially within the universe of the reader New questions arise Previously hidden beliefs come to light Tacit assumptions are exposed The unfamiliar nova of science fiction can lead to new interrogations of our own all too familiar surroundings causing us to see our previously unquestioned worlds in a new way These new understandings are at the heart of critical pedagogy The learning spaces within science fiction texts can expose the fault lines within the educational structures of the real world Questions about what it means to be human about the proper limits of technological power or about the relationships and obligations of one species to another have profound implications for 21st century educators and learners particularly those who are interested in creating just and equitable learning spaces

Learning Space Exploring Critical Pedagogy through Science Fiction draws on popular science fiction stories to provide current and future educators with the language concepts vocabulary and practices to cast a critical lens upon their own learning spaces and their own pedagogical practices For example a critical examination of the way that Yoda trains Luke Skywalker in The Empire Strikes Back reveals a great deal about the insidious nature of deficit thinking assuming that students learn best when they empty their minds and remain passive The assumed hierarchical power structure between teacher and student and the assumed relationship between learners and the knowledge with which they are supposed to be filled all of these are called into question when viewed through a critical lens The more we recognize the injustice in Yoda's pedagogy the more we might begin to see it in our own Similarly Isaac Asimov's classic Foundation trilogy imagines a world in which mathematical modeling and statistical computation are used not only to predict what people might do but instead to determine what they should do This kind of algorithmic determinism is unfortunately common in contemporary education and yet far too few educators and learners

recognize just how much of their own agency has been given over to the machines By highlighting the algorithmic inequities in the world of Asimov s text we begin to recognize similar inequities at play in our own world Ultimately this book uses science fiction to highlight educational inequities in such wide ranging topics as standard English literary canons machine learning notions of academic dishonesty epistemicide inequitable school discipline and more More importantly however it provides a framework for moving forward giving current and future educators the critical knowledge and skills both to recognize pedagogical injustice and to create viable just and sustainable alternatives **Be the Change** Linda Darling-Hammond,Nicole Ramos-Beban,Rebecca Padnos Altamirano,Maria E. Hyler,2016 Be the Change tells the remarkable story of an innovative public high school in East Palo Alto modeled after successful small schools in New York City Guided by the expertise of renowned educator Linda Darling Hammond it offers authentic and engaging instruction that has allowed students who start off far behind to graduate and go on to college in record numbers Daily Bible Study Summer 2025 Betsy Haas,Rhoda E.
