Food, Environment, and Climate Change Erinn Gilson, Sarah Kenenhan, 2018-10-18 This volume takes up the pressing issues of justice and responsibility that arise at the intersection of food and agricultural systems environmental degradation and global climate change The diverse contributions examine both the various ways that food and agricultural practices contribute to environmental degradation especially climate change and the impact that climate change is having and will have on food and agricultural practices Central questions include How can the connections between food and agriculture environmental issues and climate change best be understood What are the ethical and political responsibilities of various parties in relation to this nexus of problems Whose knowledge concerns and voices are and should be valued in making global climate policy and agricultural and food policy What are the limitations of existing policies practices and theoretical frameworks for understanding and responding to these complex problems **Beyond Moral Fundamentalism** Steven Fesmire, 2024 Moral fundamentalism is the habit of acting as though one has access to the exclusively right way to diagnose problems along with the single approvable practical solution to any particular problem This approach causes us to oversimplify situations neglect broader context take refuge in dogmatic absolutes ignore possibilities for finding common ground assume privileged access to the right way to proceed and shut off honest inquiry In this way moral fundamentalism exacerbated by social media silos also makes the worst of native impulses toward social bonding and antagonism This makes it impossible to debate and achieve superordinate social goals such as public health justice security sustainability peace and democracy Drawing from John Dewey s pluralistic and pragmatic approach to philosophical questions Steven Fesmire develops an alternative to both the oversimplification of moral fundamentalism and the arbitrariness of relativism His

pragmatic pluralism is set up as a response to particular conditions and consequences so it gains practical leverage with complex ethical political educational and policy problems without flattening variability among values or presuming that abstract theories can determine what we ought to do He argues that the reductive monistic premise that logically underlies moral fundamentalism is both unwarranted and constrictive and there is little to be said in favor of the grand philosophical quest for a unifying principle that cannot be accommodated within a wider pluralistic approach In a concrete and engaging style Fesmire clarifies and illustrates the promises and challenges of democratic decision making in societies struggling to grow beyond moral fundamentalism

The Oxford Handbook of Dewey Steven Fesmire, 2019-08-19 John Dewey was the foremost philosophical figure and public intellectual in early to mid twentieth century America He is still the most academically cited Anglophone philosopher of the past century and is among the most cited Americans of any century In this comprehensive volume spanning thirty five chapters leading scholars help researchers access particular aspects of Dewey's thought navigate the enormous and rapidly developing literature and participate in current scholarship in light of prospects in key topical areas Beginning with a framing essay by Philip Kitcher calling for a transformation of philosophical research inspired by Dewey contributors interpret appraise and critique Dewey's philosophy under the following headings Metaphysics Epistemology Science Language and Mind Ethics Law and the Starting Point Social and Political Philosophy Race and Feminist Philosophy Philosophy of Education Aesthetics Instrumental Logic Philosophy of Technology and the Unfinished Project of Modernity Dewey in Cross Cultural Dialogue The American Philosophical Tradition the Social Sciences and Religion and Public Philosophy and Practical Ethics

A Handbook of Food Crime Allison Gray, Ronald Hinch, 2019-10-09. Food today is over corporatized and under regulated. It is involved in many immoral, harmful, and illegal practices along production, distribution, and consumption systems. These problematic conditions have significant consequences on public health and well-being, nonhuman animals, and the environment, often simultaneously. In this insightful book, Gray and Hinch explore the phenomenon of food crime. Through discussions of food safety, food fraud, food insecurity, agricultural labour, livestock welfare, genetically modified foods, food sustainability, food waste, food policy, and food democracy, they problematize current food systems and criticize their underlying ideologies. Bringing together the best contemporary research in this area, they argue for the importance of thinking criminologically about food and propose radical solutions to the realities of unjust food systems.

Human Rights Of, By, and For the People Keri Iyall Smith, Louis Edgar Esparza, Judith Blau, 2017-02-03 Together the US Constitution and the Bill of Rights comprise the constitutional foundation of the United States These the oldest governing documents still in use in the world urgently need an update just as the constitutions of other countries have been updated and revised Human Rights Of

By and For the People brings together lawyers and sociologists to show how globalization and climate change offer an opportunity to revisit the founding documents Each proposes specific changes that would more closely align US law with international law The chapters also illustrate how constitutions are embedded in society and shaped by culture The constitution itself sets up contentious relationships among the three branches of government and between the federal government and each state government while the Bill of Rights and subsequent amendments begrudgingly recognize the civil and political rights of citizens These rights are described by legal scholars as negative rights specifically as freedoms from infringements rather than as positive rights that affirm personhood and human dignity The contributors to this volume offer positive rights instead The Universal Declaration of Human Rights UDHR written in the middle of the last century inspires these updates Nearly every other constitution in the world has adopted language from the UDHR The contributors use intersectionality critical race theory and contemporary critiques of runaway economic inequality to ground their interventions in sociological argument

Can I Believe? John G. Stackhouse Jr., 2020-08-21 Maybe Christianity is actually true Maybe it is what believers say it is But at least two problems make the thoughtful person hesitate First there are so many other options How could one possibly make one's way through them to anything like a rational and confident conclusion Second why do so many people choose to be Christian in the face of so many reasons not to be Christian Yes many people grow up in Christian homes and in societies but many more do not Yet Christianity has become the most popular religion in the world Why This book begins by taking on the initial challenge as it outlines a process how to think about religion in a responsible way rather than settling for such soft vagaries as faith and feeling It then clears away a number of misunderstandings from the basic story of the Christian religion misunderstandings that combine to domesticate this startling narrative and thus to repel reasonable people who might otherwise be intrigued The second half of the book then looks at Christian commitment positively and negatively Why do two billion find this religion to be persuasive thus making it the most popular explanation of everything in human history At the same time how does Christianity respond to the fact that so many people find it utterly implausible especially because so many Christians insist that theirs is the only way to God and because of the problem of evil that seems to undercut everything Christianity asserts Grounded in scholarship but never ponderous Can I Believe refuses to dodge the hard questions as it welcomes the intelligent inquirer to give Christianity at least one good look

Unsettling Food Politics Christopher Mayes, 2018-10-16 Over the past 25 years activists farmers and scholars have been arguing that the industrialized global food system erodes democracy perpetuates injustices undermines population health and is environmentally unsustainable In an attempt to resist these effects activists have proposed alternative food networks that draw on ideas and practices from pre industrial agrarian smallholder farming as well as contemporary peasant movements This book uses current debates over Michel Foucault's method of genealogy as a practice of critique and historical problematization of the present to reveal the historical constitution of contemporary alternative food

discourses While alternative food activists appeal to food sovereignty and agrarian discourses to counter the influence of neoliberal agricultural policies these discourses remain entangled with colonial logics In particular the influence of Enlightenment ideas of improvement colonial practices of agriculture as a means to establish ownership and anthropocentric relations to the land In combination with the genealogical analysis this book brings continental political philosophy into conversation with Indigenous theories of sovereignty and alternative food discourse in order to open new spaces for thinking about food and politics in contemporary Australia

What Is Agriculture For? Paul B. Thompson, Professor Emeritus
Department of Philosophy Paul B Thompson, 2025-08-15

What Is Agriculture For describes four contrasting rationales for technical and policy change in agriculture and food systems Technological Modernization applies an ethic common to every sector in the industrial economy production should seek greater efficiencies in order to lower consumer costs and secure adequate supply but should not do so in ways that harm third parties or the environment The other views single out a feature of agriculture giving it unique moral significance Sustainable Intensification emphasizes future challenges to the global food supply and Rural Resilience places special value on the social role of farmers and other producers Urban Agriculture highlights cities growing vulnerability to rurally based supply chains Each perspective leads to distinct policy goals and suggests different priorities for technical innovation At the same time the argument for any particular innovation may draw on two or more of these archetypal rationales The book does greater justice to the complexity of food politics providing tools for critical evaluation of implicit value commitments and greater understanding of opposing points of view
