Baum, Neil Crosby, Steven Devaney, 2021-01-20 Discover an insightful examination of the property investment appraisal process from leaders in the industry This book explains the process of property investment appraisal the process of estimating both the most likely selling price market value and the worth of property investments to individuals or groups of investors investment value Valuations are important They are used as a surrogate for transactions in the measurement of investment performance and they influence investors and other market operators when transacting property Valuations need to be trusted by their clients and valuers need to produce rational and objective solutions Appraisals of worth are even more important as they help to determine the prices that should be paid for assets even in times of crisis and they can indicate market under or over pricing In a style that makes the theory as well as the practice of valuation accessible to students and practitioners the authors provide a valuable critique of conventional valuation methods and argue for the adoption of more contemporary cash flow methods They explain how such valuation models are constructed and give useful examples throughout They also show how these contemporary cash flow methods connect market valuations with rational appraisals The UK property investment market has been through periods of both boom and bust since the first edition of this text was produced in 1988 As a result the book includes examples generated by vastly different market states Complex reversions over rented properties and leaseholds are all fully examined by the authors This Fourth Edition includes new material throughout including brand new chapters on development appraisals and bank lending valuations heavily revised sections on discounted cash flow models with extended examples and on the measurement and analysis of risk at an individual property asset level The heart of the book remains the critical examination of market valuation models which no other book addresses in such detail Property Management Robert C. Kyle, 1988 *Land Rights and Expropriation in Ethiopia* Daniel W. Ambaye, 2015-02-13 This thesis provides a new approach to the Ethiopian Land Law debate The basic argument made in this thesis is that even if the Ethiopian Constitution provides and guarantees common ownership of land together with the state to the people this right has not been fully realized whether in terms of land accessibility enjoyability and payment of fair compensation in the event of expropriation Expropriation is an inherent power of the state to acquire land for public purpose activities It is an important development tool in a country such as Ethiopia where expropriation remains the only method to

acquire land Furthermore the two preconditions of payment of fair compensation and existence of public purpose justifications are not strictly followed in Ethiopia The state remains the sole beneficiary of the process by capturing the full profit of land value while paying inadequate compensation to those who cede their land by expropriation Secondly the broader public purpose power of the state in expropriating the land for unlimited activities puts the property owners under imminent risk of expropriation Digest United States.
