WOMEN'S EMPOWERMENT FOR INCLUSIVE CLIMATE ACTION

Climate change is intensifying the frequency and severity of hydrometeorological hazards. As temperatures change, rain patterns become erratic, and severe weather intensifies, livelihoods and ecosystem are increasingly affected. Immediate climate action is needed, and women and girls must be at the forefront of these efforts.

IMPACT OF THE CLIMATE CRISIS ON PLANET AND PEOPLE

FLOOD

The number of people exposed to flood-prone areas has risen by **almost a quarter** since 2000, including **extreme rainfall, rising sea levels and more intense hurricanes**. Several low-lying nations, such as Kiribati, Maldives, Marshall Islands and Tuvalu face existential threats due to sea-level rise and climate change. Floods are known to affect the availability of clean drinking water, thus worsening women's collection and treatment burdens.

DROUGHTS

Today, 53 out of 191 countries and areas globally, home to **1.5 billion women and girls**, or **37.2 per cent** of the world's female population, face a high or very high exposure to droughts. Under a high-emissions scenario, projections suggest that exposure to this phenomenon could affect an additional **9 to 17 per cent** of the world's population by 2030, and **50 to 90 per cent** by 2080. Intensifying droughts and aridity correlate with worsening child marriage and adolescent birth rates in many countries.

Gendering Climate Change Geographical Insights:

Engendering Climate Change Asha Hans, Nitya Rao, Anjal Prakash, Amrita Patel, 2021-03-02 This book focuses on the gendered experiences of environmental change across different geographies and social contexts in South Asia and on diverse strategies of adapting to climate variability. The book analyzes how changes in rainfall patterns, floods, droughts, heatwaves, and landslides affect those who are directly dependent on the agrarian economy. It examines the socio-economic pressures, including the increase in women's work burdens both in production and reproduction, on gender relations. It also examines coping mechanisms such as male migration and the formation of women's collectives which create space for agency and change in rigid social relations. The volume looks at perspectives from India, Pakistan, Bangladesh, and Nepal to present the nuances of gender relations across borders along with similarities and differences across geographical, socio-cultural, and policy contexts. This book will be of interest to researchers and students of sociology, development, gender economics, environmental studies, and South Asian studies. It will also be useful for policymakers, NGOs, and think tanks working in the areas of gender, climate change, and development. *Linking Gender to Climate Change Impacts in the Global South*

Shouraseni Sen Roy, 2018-04-18 This authored book assesses the spatial patterns of climate change and gender inequalities across the Global South and analyzes the disproportionate impacts that climate change processes have on women in these regions. Though many books attempt to incorporate gender issues into climate change, this book examines the issue as a whole by addressing the relationship between climate change and gender from a number of perspectives. The book incorporates case studies from various regions of the Global South, a designation broadly defined as the countries of Africa, Middle and South America, and most of Asia, including the Middle East. In the book's two main sections, readers will learn about how climate change affects access to regional opportunities and resources, the obstacles created by climate change that affect women more strongly than men, and how affected female populations adapt to changing conditions and protect their local livelihoods. Section one, covering chapters 1 and 2, addresses the spatial patterns of climate change and gender inequalities across the Global South by analyzing long-term trends from the latest reports of the Intergovernmental Panel on Climate Change (IPCC) and the World Economic Forum. Section two, covering chapters 3 through 7, discusses the critical issues related to climate change and gender inequality and presents literature reviews and case studies in the Global South. The different issues and perspectives discussed include health, water, and food security, education, conflicts, migration, participation in decision-making processes, and changing urban social landscapes. The concluding chapter discusses policy initiatives and makes recommendations to some of the gender mainstreaming through empowerment and participation. This interdisciplinary book will appeal to academics and policy makers beyond just the fields of environmental sciences and gender studies and may be adopted as a resource for graduate students and researchers. **Gendering Green**

Adaptation Nicholas Oguge, Desalegn Ayal, Lydia Adeleke, Izael da Silva, 2021-05-20 This open access book discusses current thinking and presents the main issues and challenges associated with climate change in Africa It introduces evidences from studies and projects which show how climate change adaptation is being and may continue to be successfully implemented in African countries Thanks to its scope and wide range of themes surrounding climate change the ambition is that this book will be a lead publication on the topic which may be regularly updated and hence capture further works Climate change is a

major global challenge. However, some geographical regions are more severely affected than others. One of these regions is the African continent. Due to a combination of unfavourable socio-economic and meteorological conditions, African countries are particularly vulnerable to climate change and its impacts. The recently released IPCC special report 'Global Warming of 1.5°C' outlines the fact that keeping global warming by the level of 1.5°C is possible but also suggested that an increase by 2.0°C could lead to crises with crops agriculture fed by rain could drop by 50% in some African countries by 2020 and livestock production could damage water supplies and pose an additional threat to coastal areas. The 5th Assessment Report produced by IPCC predicts that wheat may disappear from Africa by 2080 and that maize a staple will fall significantly in southern Africa. Also arid and semi arid lands are likely to increase by up to 8% with severe ramifications for livelihoods poverty eradication and meeting the SDGs. Pursuing appropriate adaptation strategies is thus vital in order to address the current and future challenges posed by a changing climate. It is against this background that the African Handbook of Climate Change Adaptation is being published. It contains papers prepared by scholars representatives from social movements practitioners and members of governmental agencies undertaking research and or executing climate change projects in Africa and working with communities across the African continent. Encompassing over 100 contributions from across Africa it is the most comprehensive publication on climate change adaptation in Africa ever produced.

Water Security Across the Gender Divide Christiane Fröhlich, Giovanna Gioli, Roger Cremades, Henri Myrntinen, 2017-10-05. This book examines water security as a prime example of how the economic socio-cultural and political normative systems that regulate access to water reflect the evolving and gendered power relations between different societal groups. Access to water is characterized by inequalities it depends not only on natural water availability but also on the respective socio-political context. It is regulated by gender differentiated roles and responsibilities towards the resource which are strongly influenced by among others tradition religion customary law geographical availability as well as the historical and socio-political context. While gender has been recognized as a key intervening variable in achieving equitable water access most studies fail to acknowledge the deep interrelations between

social structures and patterns of water use Proof of these shortcomings is the enduring lack of data on water accessibility availability and utilization that sufficiently acknowledges the relational nature of gender and other categories of power and difference like class and socioeconomic status as well as their comprehensive analysis This book addresses this major research gap *Compassion in Disaster Management* Mark Crowther,2024-08-02 Should leadership minimise suffering This book argues yes offering leaders especially those in disaster management a way to improve their ability to lead serve and protect others during disasters and crises Drawing upon his own experiences as a disaster management specialist as well as high level interviews with disaster management leaders from the USA Australia and New Zealand Crowther bridges theory and practice to achieve three objectives Firstly to establish the political and socio cultural context in which disaster management leaders find themselves when seeking to protect citizens and minimise their suffering and vulnerability Secondly to provide an empirical account of how certain sociocultural influences affect their efficacy as leaders and that of their organisations when seeking to improve well being provide protection and reduce suffering and vulnerability Third to propose a relational leadership framework centred upon an ethic of compassion and supported by behaviours characteristics and practices that can guide leaders when addressing the causes of suffering and vulnerability across the entire disaster management cycle This framework progressively emerges as the reader navigates their way through each chapter An essential text for aspiring and experienced leaders especially those in the fields of Emergency Medical Services fire services law enforcement and emergency management It will also appeal to students and researchers in related disciplines **Doing Political Ecology** Gregory L. Simon,Kelly Kay,2024-10-02 Since its inception the field of political ecology has served as a critical hub for inclusive and transformative environmental inquiry *Doing Political Ecology* offers a distinctive entry point into this ever growing field and argues that our scholarly foundations today more than ever comprise a cross cutting latticework of research approaches and concepts This volume brings together 28 leading scholars from a range of backgrounds and geographies with contributions organized into 18 analytical lenses that highlight different approaches to critical environmental research and ways of seeing nature society interactions The book s contributors engage the breadth and depth of the field recognizing a variety of roots and genealogies and give ample voice to these rich and complementary lineages This inclusive presentation of the field allows diverse theoretical and empirical approaches to intermingle in novel ways Readers will emerge with a wide ranging understanding of political ecology and will attain a diverse toolkit for evaluating human environment interactions Each chapter astutely grounds key methodological theoretical topical and conceptual approaches that animate a range of influential cutting edge and complementary ways of doing political ecology Unveiling Pachacamac Giancarlo Marcone,2022-08-02 This volume synthesizes 25 years of new data and hypotheses on the sacred Andean site of Pachacamac a sanctuary that has an enduring presence in Peruvian history and plays a pivotal role in the formation of current views about religion and thought in the pre Hispanic period **The Palgrave Handbook of Social**
