Innovations in Hospital Architecture Stephen Verderber, 2010-03-31 This indispensable reference book captures key recent developments in the rapidly evolving field of sustainable hospital architecture. Today's architects must provide hospitals which enable high quality care for diverse patient populations in carbon neutral care settings and this book succinctly considers what needs to be done in order to meet that challenge. The contemporary hospital is viewed in the context of global climate change, the planet's diminishing natural resources, and the spiralling cost of operating healthcare facilities. Stephen Verderber considers the future of the hospital and supplies a compendium of 100 planning and design considerations for the building type. The book includes twenty-eight case studies of built and unbuilt hospitals from around the world. These are grouped into five types: autonomous, community-based hospitals, children's hospitals, rehabilitation and elderly care centres, and hospitals, regional medical centre campuses, and visionary unbuilt projects. Beautifully and extensively illustrated with many photographs, diagrams, and floor plans, this is essential reading for all architects, planners, engineers, product manufacturers, clients, healthcare providers, and government agencies involved in the present and future of sustainable healthcare environments.

The Designer's Field Guide to Collaboration

Caryn Brause, 2016-11-18 The Designer's Field Guide to Collaboration provides practitioners and students with the tools necessary to collaborate effectively with a wide variety of partners in an increasingly socially complex and technology driven design environment. Beautifully illustrated with color images, the book draws on the expertise of top professionals in the allied fields of architecture, landscape architecture, engineering and construction management and brings to bear research from diverse disciplines such as software development, organizational behavior and outdoor leadership training. Chapters examine emerging and best practices for effective team building, structuring workflows, enhancing communication, managing conflict and developing collective vision, all to ensure the highest standards of design excellence. Case studies detail and reflect on the collaborative processes used to create award winning projects by Studio Gang, Perkins Will, Tod Williams Billie Tsien Architects, Partners Gensler, CDR Studio, Mahlum Architects, In-Site Architecture and Thornton Tomasetti's Core Studio. The book also provides pragmatic ideas and formal exercises for brainstorming, productively evaluating ideas, communicating effectively and offering feedback. By emphasizing the productive influence and creative possibilities of collaboration within the changing landscape of architectural production, the book proposes how these practices can be taught in architecture school and expanded in practice. In a changing world that presents increasingly complex challenges, optimizing these collaborative skills will prove not only necessary but crucial to the process of creating advanced architecture. **Spatial**
