Mathematical Systems Theory in Biology, Communications, Computation and Finance Joachim Rosenthal, David S. Gilliam, 2012-12-06 Mathematical systems theory is a vibrant research area in its own right. The theory has an impact in numerous applications areas including aeronautics, biological systems, chemical engineering, communication systems, financial engineering, and robotics to name just a few. This volume contains survey and research articles by some of the leading researchers in mathematical systems theory. Many authors have taken special care that their articles are self contained and accessible also to non specialists. The articles contained in this volume are from those presented as plenary lectures, invited one hour lectures, and minisymposia at the 15th International Symposium on the Mathematical Theory of Networks and Systems held at the University of Notre Dame August 12-16 2002. **Advanced Control of Chemical Processes**

(ADCHEM'91) K. Najim, E. Dufour, 2014-05-23 This volume contains 40 papers which describe the recent developments in advanced control of chemical processes and related industries. The topics of adaptive control, model based control, and neural networks are covered by 3 survey papers. New adaptive statistical model based control and artificial intelligence techniques and their applications are detailed in several papers. The problem of implementation of control algorithms on a digital computer is also considered. Management zukunftsfähige Waldnutzung Oliver Thees, 2009 Waldmanagement.
