Diabetes Chronic Complications 3rd Edition:

Diabetes Kenneth M. Shaw, Michael H. Cummings, 2005-12-13 Diabetes is one of the leading causes of morbidity and mortality worldwide. Major complications include nephropathy, neuropathy, retinopathy, and heart disease, which affect thousands of diabetics every year. The prevention and treatment of such complications encompass pharmacological, surgical, and educational approaches, all of which need to be coordinated for optimal management of people with diabetes. This user-friendly new edition of *Diabetes Chronic Complications*, previously called *Diabetic Complications*, has been completely revised and updated to reflect the rapid developments currently taking place in the field. Each chapter describes the epidemiology, aetiology, and management of a particular complication and discusses the organisation and delivery of care. Includes all the major chronic complications of diabetes. Presents a practical approach to the treatment of diabetes complications. Written by world's leading experts in the field. Features algorithms for screening and treatment of diabetes complications.

Handbook of Nutritional Disorders Jahangir Moini, Katia Ferdowsi, 2024-12-10 *Handbook of Nutritional Disorders* is a comprehensive handbook covering topics in nutrition, malnutrition, and the clinical disorders associated with nutrition, from deficiency to toxicity. It includes information on disorders related to carbohydrate, lipid, and protein metabolism, as well as vitamin and mineral abnormalities. The book details various types of supplements, feeding methods, and therapies for many specific patients. It aims to educate readers on ways to prevent disorders resulting from all types of malnutrition and their potentially severe complications. Features: Strong focus on diabetes; featuring information on various forms of the disease and treatment information. Detailed discussion of lipids and related disorders. Cardiovascular disease is the number one cause of death; informs users on prevention and treatment of hypertension, myocardial infarction, and stroke. Contains information on selective nutritional disorders including obesity, dehydration, imbalances, malabsorption, alcoholism, neuropsychiatric disorders, eating disorders, cancer, and pollutant poisonings. Written for researchers, academia, and students in healthcare and nutrition fields, this book educates individuals on prevention of disorders resulting from all types of malnutrition and their potentially severe complications.
