## **Digital Remote Sensing:**

**Digital Remote Sensing** Prithvish Nag,M. Kudrat,1998      Aerospatial Remote Sensing in Geology Jean-Yves Scanvic,1997-01-01 Using numerous operational and research oriented examples this text seeks to explain how the human eye and brain can extract and use remotely sensed data in the fields of applied geology and mineral exploration      **Remote Sensing Digital Image Analysis** John A. Richards,2012-12-06 Possibly the greatest change confronting the practitioner and student of remote sensing in the period since the first edition of this text appeared in 1986 has been the enormous improvement in accessibility to image processing technology Falling hardware and software costs combined with an increase in functionality through the development of extremely versatile user interfaces has meant that even the user unskilled in computing now has immediate and ready access to powerful and flexible means for digital image analysis and enhancement An understanding at algorithmic level of the various methods for image processing has become therefore even more important in the past few years to ensure the full capability of digital image processing is utilised This period has also been a busy one in relation to digital data supply Several nations have become satellite data gatherers and providers using both optical and microwave technology Practitioners and researchers are now faced therefore with the need to be able to process imagery from several sensors together with other forms of spatial data This has been driven to an extent by developments in Geographic Information Systems GIS which in tum have led to the appearance of newer image processing procedures as adjuncts to more traditional approaches      **Urban Remote Sensing** Zhenfeng Shao,2023-01-05 This compendium is based on more than ten years of urban remote sensing teaching experience scientific research achievements and the latest developments of remote sensing technology The volume is divided into ten chapters which describes the principles of urban remote sensing and multi source remote sensing big data acquisition urban remote sensing image processing methods urban remote sensing image specific applications in related industries and the prospect of urban remote sensing development It summarizes the achievements on urban remote sensing projects uses a large number of algorithm studies as intuitive materials combines the achievements of urban remote sensing technology and provides typical industry solutions or case studies in specific applied urban remote sensing areas This essential reference textbook benefits undergraduate and graduate students and anyone keen in urban remote sensing      Remote Sensing Digital Image Analysis: An Introduction Xiuping Jia John A. Richards,2008      **Computer Processing of Remotely-Sensed Images** Paul M. Mather,2004-06-28 Remotely sensed images of the Earth provide information about the geographical distribution of natural and cultural features as well as a record of changes in environmental conditions over time This text offers technical guidance to those involved in processing and classifying such data      **Remote Sensing And Gis** Dr.Ch.Bhavannarayana,2025-01-04 Dalit History and Literature offer a unique and critical perspective on the marginalized communities in India The struggle resilience and creative expression of the Dalit community have generated a rich tapestry of narratives making it imperative to explore this

literary and historical treasure trove This book **Voices of Resilience Exploring Dalit History and Literature** is a comprehensive collection of articles delving into the rich tapestry of Dalit history and Dalit literature and has brought together scholars and experts from History and English Literature domain to offer multifaceted insights into the unique cultural social and literary heritage of the Dalit community in India This book is an attempt to bridge the gap in our understanding of Dalit History and Literature by providing a platform for critical analysis interpretation and exploration and serves as a reference work for students scholars and anyone interested in Dalit scholarship

**Remote Sensing Based Building Extraction** Mohammad Awrangjeb,Xiangyun Hu,Bisheng Yang,Jiaojiao Tian,2020-03-27 Building extraction from remote sensing data plays an important role in urban planning disaster management navigation updating geographic databases and several other geospatial applications Even though significant research has been carried out for more than two decades the success of automatic building extraction and modeling is still largely impeded by scene complexity incomplete cue extraction and sensor dependency of data Most recently deep neural networks DNN have been widely applied for high classification accuracy in various areas including land cover and land use classification Therefore intelligent and innovative algorithms are needed for the success of automatic building extraction and modeling This Special Issue focuses on newly developed methods for classification and feature extraction from remote sensing data for automatic building extraction and 3D

Introduction to Modern Photogrammetry Edward M. Mikhail,James S. Bethel,J. Chris McGlone,2001-03-26 This text is designed to give students a strong grounding in the mathematical basis of photogrammetry while introducing them to related fields such as remote sensing and digital image processing Suitable for undergraduate photogrammetry courses typically aimed at junior and senior students and for graduate level courses at the Master s level Excellent reference for those working in related fields

Remote Sensing of Volcanic Processes and Risk Francesca Cigna,Deodato Tapete,Zhong Lu,Susanna K. Ebmeier,2021-03-17 Remote sensing data and methods are increasingly being implemented in assessments of volcanic processes and risk This happens thanks to their capability to provide a spectrum of observation and measurement opportunities to accurately sense the dynamics magnitude frequency and impacts of volcanic activity This book

includes research papers on the use of satellite aerial and ground based remote sensing to detect thermal features and anomalies investigate lava and pyroclastic flows predict the flow path of lahars measure gas emissions and plumes and estimate ground deformation The multi disciplinary character of the approaches employed for volcano monitoring and the combination of a variety of sensor types platforms and methods that come out from the papers testify to the current scientific and technology trends toward multi data and multi sensor monitoring solutions The added value of the papers lies in the demonstration of how remote sensing can improve our knowledge of volcanoes that pose a threat to local communities back analysis and critical revision of recent volcanic eruptions and unrest periods and improvement of modeling and prediction methods Therefore the selected case studies also demonstrate the societal impact that this scientific discipline can potentially have on volcanic hazard and risk management
