The Culture of Cleanliness in Renaissance Italy Douglas

Biow, 2018-07-05 Concerned about sanitation during a severe bout of plague in Milan Leonardo da Vinci designed an ideal clean city Leonardo was far from alone among his contemporaries in thinking about personal and public hygiene as Douglas Biow shows in *The Culture of Cleanliness in Renaissance Italy* A concern for cleanliness he argues was everywhere in the Renaissance Anxieties about cleanliness were expressed in literature from humanist panegyrics to bawdy carnival songs as well as in the visual arts Biow surveys them all to explain why the topic so permeated Renaissance culture At one level cleanliness he documents was a matter of real concern in the Renaissance At another he finds issues such as human dignity self respect self discipline social distinction and originality were rethought as a matter of artistic concern *The Culture of Cleanliness in Renaissance Italy* moves from the clean to the unclean from the lofty to the base Biow first examines the socially elevated who defined and distinguished themselves as clean pure and polite He then turns to soap an increasingly common commodity in this period and the figure of the washerwoman Finally he focuses on latrines which were universally scorned yet functioned artistically as figures of baseness creativity and fun in the works of Dante and Boccaccio Paralleling this social stratification is a hierarchy of literary and visual artifacts from the discourse of high humanism to filthy curses and scatological songs Deftly bringing together high and low as well as literary and visual cultures this book provides a fresh perspective on the Italian Renaissance and its artistic legacy

The People's Welfare William J. Novak,2000-11-09 Much of today s political rhetoric decries the welfare state and our maze of government regulations Critics hark back to a time before the state intervened so directly in citizens lives In The People s Welfare William Novak refutes this vision of a stateless past by documenting America s long history of government regulation in the areas of public safety political economy public property morality and public health Challenging the myth of American individualism Novak recovers a distinctive nineteenth century commitment to shared obligations and public duties in a well regulated society Novak explores the by laws ordinances statutes and common law restrictions that regulated almost every aspect of America s society and economy including fire regulations inspection and licensing rules fair marketplace laws the moral policing of prostitution and drunkenness and health and sanitary codes Based on a reading of more than one thousand court cases in addition to the leading legal and political texts of the nineteenth century The People s Welfare demonstrates the deep roots of regulation in America and offers a startling reinterpretation of the history of American governance Inner Hygiene James C. Whorton,2000 This book will have strong appeal to historians of medicine American and European historians with an interest in health and popular culture physicians and other health professionals and laypersons concerned about diet and health BOOK JACKET Sanitation in Urban Britain, 1560-1700 Leona J. Skelton,2015-12-22 Popular belief holds that throwing the contents of a chamber pot into the street was a common occurrence during the early modern period This book challenges this deeply entrenched stereotypical image as the majority of urban inhabitants and their local governors alike valued clean outdoor public spaces vesting interest in keeping the areas in which they lived and worked clean Taking an extensive tour of over thirty towns and cities across early modern Britain focusing on Edinburgh and York as in depth case studies this book sheds light on the complex relationship between how governors organised street cleaning managed waste disposal and regulated the cleanliness of the outdoor environment top down and how typical urban inhabitants self regulated their neighbourhoods bottom up The urban rural manure trade sanitation infrastructure waste disposal technology plague epidemics contemporary understandings of malodours and miasmatic disease transmission and urban agriculture are also analysed This book will enable undergraduates postgraduates and established academics to deepen their understanding of daily life and sensory experiences in the early modern British town This innovative work will appeal to social cultural and legal historians as well as researchers of history of medicine and

public health The London Hanged Peter Linebaugh, 2020-05-05 Peter Linebaugh's groundbreaking history has become an inescapable part of any understanding of the rise of capitalism. In eighteenth century London the spectacle of a hanging was not simply a form of punishing transgressors. Rather it evidently served the most sinister purpose for a privileged ruling class of forcing the poor population of London to accept the criminalization of customary rights and the new forms of private property. Necessity drove the city's poor into inevitable conflict with the changing property laws such that all the working class men and women of London had good reason to fear the example of Tyburn's Triple Tree. In this new edition Peter Linebaugh reinforces his original arguments with responses to his critics based on an impressive array of historical sources. As the trend of capital punishment intensifies with the spread of global capitalism *The London Hanged* also gains in contemporary relevance.

Livable Streets 2.0 Bruce Appleyard, 2021-03-22 *Livable Streets 2.0* offers a thorough examination of the struggle between automobiles, residents, pedestrians and other users of streets along with evidence based practical strategies for redesigning city street networks that support urban livability. In 1981 when Donald Appleyard's *Livable Streets* was published it was globally recognized as a groundbreaking work, one of the most influential urban design books of its time. Unfortunately he was killed a year later by a speeding drunk driver. This latest update *Livable Streets 2.0* revisited by his son Bruce updates the topic with the latest research, new case studies and best human centered practices for creating more livable streets for all. It is essential reading for those who influence future directions in city and transportation planning, urban design and community regeneration and placemaking. Incorporates the most current empirical research on urban transportation and land use practices that support the need for more livable communities. Includes recent case studies from around the world on successful projects, campaigns, programs and other efforts. Contains new coverage of vulnerable populations.

The Greene Book of Black Knowledge Will EL M. STJ Heron, 2022-05-04 What stake do we as Foundational Black Americans really have to claim in the history of this country, this continent and the world if any? When you think of Foundational Black Americans formerly misnamed as African Americans, Negroes, Coloreds, Black, what thought comes to mind and what accomplishments are we known for? Were we slaves brought to this country by force, low class citizens of a foreign nation with no home to call their own? Or is there more to the story so much more that even the mere mention of our accolades would discredit the history of the masses? What if I were to tell you that our history in this country from the perspective that everything we have been taught is but a half truth? Who built the buildings, roads and monuments in this country? Where did those people come from and where did they go? Where did the many science, technology and artforms of the country and the world develop? What is the hidden history behind what we are taught but most importantly why is this knowledge kept from us? This book will capture some of the lesser known accomplishments and esoteric information that has been passed down word of mouth by some and systematically discredited by others. Fortunately true knowledge can neither cease nor desist and this text will show what you can do to utilize that information today. It is time that we take our own

history by the rungs away from those who would paint an inaccurate picture of our past This will allow us to re introduce ourselves not for exposure and clout but for self vindication and reasonable doubt Current Catalog ,1971 First multi year cumulation covers six years 1965 70 **The Book of Lists** David Wallechinsky,Amy D.
