Optimization of adaptive test design methods for the determination of steady-state data-driven models in terms of combustion engine calibration Sandmeier, Nino, 2022-12-01 This thesis deals with the development of a model based adaptive test design strategy with a focus on steady state combustion engine calibration. The first research topic investigates the question how to handle limits in the input domain during an adaptive test design procedure The second area of scope aims at identifying the test design method providing the best model quality improvement in terms of overall model prediction error To consider restricted areas in the input domain a convex hull based solution involving a convex cone algorithm is developed the outcome of which serves as a boundary model for a test point search A solution is derived to enable the application of the boundary model to high dimensional problems without calculating the exact convex hull and cones Furthermore different data driven engine modeling methods are compared resulting in the Gaussian process model as the most suitable one for a model based calibration To determine an appropriate test design method for a Gaussian process model application two new strategies are developed and compared to state of the art methods A simulation based study shows the most benefit applying a modified mutual information test design followed by a newly developed relevance based test design with less computational effort The boundary model and the relevance based test design are integrated into a multicriterial test design strategy that is tailored to match the requirements of combustion engine test bench measurements A simulation based study with seven and nine input parameters and four outputs each offered an average model quality improvement of 36 % and an average measured input area volume increase of 65 % compared to a non adaptive space filling test design The multicriterial test design was applied to a test bench measurement with seven inputs for verification Compared to a space filling test design measurement the improvement could be confirmed with an average model quality increase of 17 % over eight outputs and a 34 % larger measured input area Diese Arbeit befasst sich mit der Entwicklung einer modellbasierten adaptiven Versuchsplanungsstrategie fr die Anwendung in der Applikation des Station rverhaltens von Verbrennungsmotoren Der erste Forschungsteil untersucht wie sich Grenzen im Eingangsraum in die Versuchsplanung eines adaptiven Prozesses einbinden lassen Ein weiterer Fokus liegt auf der Identifikation einer modellbasierten Versuchsplanung die eine bestm gliche Verbesserung der globalen Modellqualit t hinsichtlich des Pr diktionsfehlers erm glicht Es wird ein Grenzraummodell auf Basis der konvexen H lle unter Zuhilfenahme eines Algorithmus zur Bestimmung eines konvexen Konus entwickelt das als Grundlage fr eine Versuchsplanung in beschr nkten Eingangsr umen verwendet wird Um die Anwendbarkeit bei hochdimensionalen Problemstellungen zu gew hrleisten wird ein Verfahren vorgestellt das eine

Berechnung auch ohne die Bestimmung der exakten konvexen H lle und konvexen Konen erm glicht Des Weiteren werden verschiedene Methoden zur datengetriebenen Modellbildung des Verbrennungsmotors verglichen wobei das Gau Prozess Modell als die geeignetste Modellierungsmethode hervorgeht Um die bestm gliche Versuchsplanungsmethode bei der Anwendung des Gau Prozess Modells zu ermitteln werden zwei neue Strategien entwickelt und mit verf gbaren Methoden aus der Literatur verglichen Eine simulationsbasierte Studie zeigt dass eine angepasste Mutual Information Methode die besten Ergebnisse liefert Ein neu entwickeltes relevanzbasiertes Verfahren erreicht die zweitbesten Ergebnisse bietet aber einen geringeren Berechnungsaufwand als das Mutual Information Verfahren Das Grenzmodell und das relevanzbasierte Verfahren werden in einem multikriteriellen Versuchsplanungsverfahren zusammengef hrt das an die Anforderungen von Messungen an einem Verbrennungsmotorenpr fstand angepasst ist In einer simulationsbasierten Studie mit sieben bzw neun Eingangsparametern und jeweils vier Ausg ngen konnte eine durchschnittliche Modellqualit tsverbesserung von 36 % und eine mittlere Vergr erung des vermessenen Eingangsraumvolumens von 65 % im Vergleich zu einer nichtadaptiven raumf llenden Versuchsplanung gezeigt werden Das multikriterielle Versuchsplanungsverfahren wurde anhand von Pr fstandsmessungen mit sieben Eingangsparametern verifiziert Im Vergleich zu einer raumf llenden Versuchsplanung konnte eine mittlere Modellqualit tsverbesserung ber alle acht Ausg nge von 17 % und ein um 34 % vergr ertes vermessenes Eingangsraumvolumen erreicht werden wodurch die Ergebnisse der Simulationen best tigt werden konnten Health Services Management: A Case Study Approach, Eleventh Edition Ann Scheck McAlearney, Anthony R. Kovner, 2017-09-01 Instructor Resources Instructor's Manual Today's healthcare managers face increasingly complex challenges and often must make decisions quickly When a difficult situation arises managers can no longer simply look it up online or in the management literature Properly looking it up involves knowing where and how to look appropriately framing a research question weighing valid evidence and understanding what is required to make proposed solutions work Health Services Management A Case Study Approach offers a diverse collection of case studies to help readers learn and apply key concepts of management with an emphasis on the use of evidence in management practice. The case study authors many of whom are practitioners or academics who work closely with practitioners present realistic management challenges across a variety of settings They examine potential responses to those challenges by health services managers and other stakeholders and they provide a platform for meaningful discussion of opportunities and constraints for management decision makers attempting to implement change This edition includes 60 case studies 32 of which are brand new arranged thematically into six sections The Role of the Manager Control Organizational Design Professional Integration Adaptation and Accountability The new cases include the following Better Metrics for Financial Management What Makes a Patient Centered Medical Home Doing the Right Thing When the Financials Do Not Support Palliative Care Hearing the Patient Voice Working with Patient and Family Advisers to Improve the Patient Experience Managed Care Cautionary Tale A Case Study in Risk Adjustment and

Patient Dumping Learning by example is one of the oldest forms of learning and the case study approach offers a time tested way for students and healthcare professionals to develop practical skills that are not easily acquired through lectures Health Services Management has been used in classrooms since 1978 and this eleventh edition offers a fresh take on a classic text

Thomke, 2020-02-18 Don't fly blind See how the power of experiments works for you When it comes to improving customer experiences trying out new business models or developing new products even the most experienced managers often get it wrong They discover that intuition experience and big data alone don t work What does Running disciplined business experiments And what if companies roll out new products or introduce new customer experiences without running these experiments They fly blind That's what Harvard Business School professor Stefan Thomke shows in this rigorously researched and eye opening book It guides you through best practices in business experimentation illustrates how these practices work at leading companies and answers some fundamental questions What makes a good experiment How do you test in online and brick and mortar businesses In B2B and B2C How do you build an experimentation culture Also best practice means running many experiments Indeed some hugely successful companies such as Amazon Booking com and Microsoft run tens of thousands of controlled experiments annually engaging millions of users Thomke shows us how these and many other organizations prove that experimentation provides significant competitive advantage How can managers create this capability at their own companies Essential is developing an experimentation organization that prizes the science of testing and puts the discipline of experimentation at the center of its innovation process While it once took companies years to develop the tools for such

large scale experiments advances in technology have put these tools at the fingertips of almost any business professional By combining the power of software and the rigor of controlled experiments today s managers can make better decisions create magical customer experiences and generate big financial returns Experimentation Works is your guidebook to a truly new way of thinking and innovating EBOOK: Fluid Mechanics Fundamentals and Applications (SI units) Yunus Cengel, John Cimbala, 2013-10-16 Fluid Mechanics Fundamentals and Applications is written for the first fluid mechanics course for undergraduate engineering students with sufficient material for a two course sequence This Third Edition in SI Units has the same objectives and goals as previous editions Communicates directly with tomorrow s engineers in a simple yet precise manner Covers the basic principles and equations of fluid mechanics in the context of numerous and diverse real world engineering examples and applications Helps students develop an intuitive understanding of fluid mechanics by emphasizing the physical underpinning of processes and by utilizing numerous informative figures photographs and other visual aids to reinforce the basic concepts Encourages creative thinking interest and enthusiasm for fluid mechanics New to this edition All figures and photographs are enhanced by a full color treatment New photographs for conveying practical real life applications of materials have been added throughout the book New Application Spotlights have been added to the end of selected chapters to introduce industrial applications and exciting research projects being conducted by leaders in the field about material presented in the chapter New sections on Biofluids have been added to Chapters 8 and 9 Addition of Fundamentals of Engineering FE exam type problems to help students prepare for Professional Engineering exams
