Skillful Performance Jörgen Sandberg, Linda Rouleau, Ann Langley, Haridimos Tsoukas, 2017-07-13 One of the most intriguing questions since the time of

Plato concerns what defines skillful performance in terms of specific capabilities knowledge competence and expertise As Frederick Taylor famously noted an answer to that question would enable us to know what to focus on and what to do to improve the performance of individuals groups and organizations Although we have come to know a great deal about the properties of capabilities knowledge competence and expertise at large we know significantly less about how they are enacted in skillful performance Thus how skillful performance draws on knowledge how skills develop and how competencies and capabilities are put to action are still eluding us Process thinking has not sufficiently explored skillful performance This book aims to address this gap It brings together scholars from different backgrounds traditions and disciplines whose common perspective is distinctly process oriented They seek to rethink capabilities knowledge competence and expertise not as if these phenomena were already accomplished but on the contrary as processes in the making as performative accomplishments Such rethinking opens up several new conversations and extends the range of inquiry about how capabilities knowledge competence and expertise are accomplished in practice and consequently how they may be improved

IV C. A. Brebbia, F. D. Pineda, 2010. Tourism has become a major international industry with many countries all over the world relying on the income it produces. Because it is a major source of finances and employment, government and other institutions actively promote tourism regardless of the impact on the environment, ecology and social structure of the region. The demands of tourism can contribute to the destruction of the natural and cultural environment upon which it depends. The natural and cultural landscape's capacity to accommodate the local and worldwide effects of tourism, the typology thereof and its implications for the economy and society constitute very important study objectives. The development of tourism can result in the degradation of natural landscapes that paradoxically attract tourists to such areas. Featured topics include Tourism Strategies, Tourism as a Tool of Development, Tourism Impact, Tourism and Protected Areas, Rural Tourism, Community Involvement, IT and Tourism, Climate Change and Tourism, Environmental Issues, Art, Architecture and Culture, Modelling Emergent Strategies for Tourism Development, Landscape and Tourism, Tourism and Urban Planning.
