**Reinventing the Social Scientist and Humanist in the Era of Big Data: A Perspective from South African Scholars** Susan Brokensha, Burgert A. Senekal, Eduan Kotzé, 2019-12-01

This book explores the big data evolution by interrogating the notion that big data is a disruptive innovation that appears to be challenging existing epistemologies in the humanities and social sciences. Exploring various controversial facets of big data such as ethics, data power and data justice, the book attempts to clarify the trajectory of the epistemology of big data-driven science in the humanities and social sciences.

**Synthetic Data and Generative AI** Vincent Granville, 2024-01-09

Synthetic Data and Generative AI covers the foundations of machine learning with modern approaches to solving complex problems and the systematic generation and use of synthetic data. Emphasis is on scalability, automation, testing, optimizing and interpretability of explainable AI. For instance, regression techniques including logistic and Lasso are presented as a single method without using advanced linear algebra. Confidence regions and prediction intervals are built using parametric bootstrap without statistical models or probability distributions. Models including generative models and mixtures are mostly used to create rich synthetic data to test and benchmark various methods. Emphasizes numerical stability and performance of algorithms, computational complexity. Focuses on explainable AI, interpretable machine learning with heavy use of synthetic data and generative models, a new trend in the field. Includes new, easier construction of confidence regions without statistics, a simple alternative to the powerful well-known XGBoost technique. Covers automation of data cleaning favoring easier solutions when possible. Includes chapters dedicated fully to synthetic data applications, fractal-like terrain generation with the diamond square algorithm and synthetic star clusters evolving over time and bound by gravity.
