development doesn't serve the needs of Chinese business leaders very well. And it creates new avoidable challenges. Enter Leadership Wisdom for Businesses in China, a powerful four-book series that examines natural law-based values for business leadership within the rich Chinese traditional and current cultural context. Remple offers a framework to promote individual and collective potential while creating a successful and competitive business as community. Book One, Confronting the Business Leadership Crisis, launches the series by providing an overview of business leadership approaches, examining the current global business leadership crisis and its realities in China, and making a case for natural law-based values business leadership. Based on these values, Remple outlines ten key leadership responsibility areas and supporting operating principles for each responsibility area to realize business leadership improvements. Much more than a theoretical overview of business leadership, this book series offers a roadmap for developing both self-leadership and business leadership within a whole company. Both are essential. Supported by an experienced Chinese project team consisting of researchers, educators, writers, and editors, business leaders and other stakeholders, this culturally relevant book series has been written for English and Mandarin-speaking business leaders and entrepreneurs, leadership consultants and trainers, and post-secondary leadership programs in China. However, stakeholders in the West will also find great value in this comprehensive exploration of natural law-based values business leadership in the Western cultural context. The other three books in the Leadership Wisdom for Business Success in China series are Book Two, Developing a Value-Based Business; Book Three, Results-Based Community Values in Strategic Decision Making; and Book Four, Culture Impacts Strategic Implementation Success. Also available in Mandarin.

Workforce Development and Skill Formation in Asia John Benson, Howard Gospel, Ying Zhu, 2013-05-29 Asia has undergone rapid transformation over the past several decades as many countries have embraced new technologies and the processes of globalisation. Over this period, the inflow of foreign capital into the region, the level of trade amongst these countries, and trade with other parts of the world has increased substantially. The ensuing economic growth has led to some significant changes in labour markets and the demand for skilled employees and their deployment within organisations. Focusing on a number of developed and developing Asian economies, this book explores the dynamics of workforce development and skill formation and considers questions of both skills shortages and skills gaps. The book assesses the current state of training in the selected Asian economies, the weaknesses and strengths of their various training approaches, and what the present state of training means for the future economic development of these economies.
