Development-induced Displacement and Human Rights in Africa Romola Adeola, 2020-09-21 Within the context of the 2009 Kampala Convention this book examines how a balance can be struck between the imperative of development projects and the rights of persons likely to be displaced in Africa Following independence many African states embarked on large scale development projects such as dams urban renewal and extraction of natural resources and have had to grapple with how to protect displaced communities while implementing development projects These projects were considered a panacea for Africa s development and the economic interests of the majority were

often considered over and above the interests of the minority of people who were displaced by these projects This book examines how a balance can be struck between the imperative of development and the rights of displaced persons within the context of the African Union Convention on the Protection and Assistance of Internally Displaced Persons in Africa the Kampala Convention Romola Adeola analyses the obligations that are placed on African states by the Kampala Convention in the context of development induced displacement This book will be of interest to scholars of human rights law forced migration African Studies and development

Country Frameworks for Development Displacement and Resettlement Susanna Price,Jane Singer,2019-03-28 The problem of escalating population displacement demands global attention and country co ordination This book investigates the particular issue of development induced displacement whereby land is seized or restricted by the state for the purposes of development projects Those displaced by these schemes often risk losses to their homes livelihoods food security and socio cultural support for which they are rarely fully compensated Bringing together 22 specialist researchers and practitioners from across the globe this book provides a much needed independent analysis of country frameworks for development induced displacement spanning Asia Africa Central and South America As global competition for land increases public and private sector lenders are lightening their social safeguards shifting the oversight for protecting the displaced to national law and regulations This raises a central question Do countries have effective ways of addressing the risks and lost opportunities for their people who are displaced While many countries remain impervious to the problem the book also shines a light on the few who are pioneering new legislation and strategies intended to address questions such as should the social costs to those displaced help determine whether a project meets the public interest and merits financing Does the modern state need powers of eminent domain How

Global Implications of Development, Disasters and Climate Change Susanna Price, Jane Singer, 2015-08-11 Displacements in the Asia Pacific region are escalating. The region has for decades experienced more than half of the world's natural disasters and in recent years a disproportionately high share of extreme weather related disasters which displaced 19 million people in 2013 alone. This volume offers an innovative and thought provoking Asia Pacific perspective on an intensifying global problem: the forced displacement of people from their land homes and livelihoods due to development disasters and environmental change. This book draws together theoretical and multidisciplinary perspectives with diverse case studies from around the region including China's Three Gorges Reservoir, Japan's Fukushima disaster and the Pacific's Banaba resettlement. Focusing on responses to displacement in the context of power asymmetries and questions of the public interest, the book highlights shared experiences of displacement, seeking new approaches and solutions that have potential global application. This book shows how displaced peoples respond to interlinked impacts that unravel their social fabric and productive bases, whether through sporadic protest, organised campaigns, empowered mobility or even community based negotiation of resettlement solutions. The volume will be of great interest to researchers and postgraduate students in development studies, environmental and climate change studies, anthropology, sociology, human geography, international law and human rights.

Managing Community Resettlement Robert Gerrits, 2023-06-22 Each year millions of people are displaced from their homes and lands. While international environmental and social performance standards on land access and involuntary resettlement exist, no framework supporting livelihood restoration has been developed. This book provides a framework that will help improve practice for those who are involved in resettlement projects and crucially improve the outcomes for the resettlement affected households and communities. Evidence from the implementation of public and private sector led resettlement projects indicates that livelihood restoration is a persistent shortcoming, if not failure, across these projects. This book addresses this issue by re-characterising the livelihood restoration objective as livelihood re-establishment and development and proposes a framework for the entire resettlement process that puts livelihood considerations first. The framework enables proactive identification of the potential livelihood challenges associated with each step of the resettlement process: design, planning, execution, monitoring and evaluation, as well as the opportunities that resettlement project development and induced economic growth create. This book is essential reading for experts in social impact assessment, resettlement specialists, planners, administrators, non-governmental and civil society organisations and students of development studies and social policy.
