Restatement of Labour Law in Europe Bernd Waas, Guus Heerma van Voss, 2020-01-09 This book is part of a series which sets out a restatement of labour law in Europe Its second volume looks at atypical employment relationships in Europe Opening with a restatement the book provides comparative commentary on the question of how fixed term employment relationships part time employment relationships and temporary agency work is regulated by law in the individual states which case law of the courts must be observed in this respect and which possibilities exist for shaping such relationships on the basis of collective bargaining agreements The book goes on to systematically explore the national regulatory framework of Austria Belgium Bulgaria Croatia Cyprus Czech Republic Denmark Estonia Finland France Germany Greece Hungary Iceland Ireland Italy Latvia Lithuania Luxembourg Malta Montenegro Netherlands North Macedonia Norway Poland Portugal Romania Russia Serbia Slovakia Slovenia Spain

Sweden Switzerland Turkey and the United Kingdom In this area which is largely shaped by EU law in many countries the commonalities and differences with regard to the relevant regulatory issues are examined This important new project provides the definitive survey of labour law in Europe today [La responsabilit  medica](#) Mario Berruti, 2013-06-18 Un libro sulla responsabilit  del medico dal punto di vista penale e civile *Constitutional Framework of European Labour Law in Italy, France, Germany, Portugal and Spain* Lu s Gon alves da Silva, Sara Leit o, 2023-12-01 The challenges that labour law currently faces are well known The emergence of new forms of work and the growing importance of technology in the age of the Fourth Industrial Revolution are important tests of the resilience of this field of law and its function regulating the labour market Therefore it is becoming increasingly important to examine the fundamentals of labour law especially how subordinate labour is addressed in various countries constitutions in order to focus the analysis of the new phenomena affecting labour relations on their fundamental frameworks In this context this book puts forward an overarching framework that reflects how the Italian German French Portuguese and Spanish constitutions view labour in terms of both collective and individual relations particularly the right to collective bargaining the right to strikes and lock outs job security and the right to remuneration without losing sight of each Constitution s historical and political context The aim of this book is therefore to provide an overview of the labour law frameworks in the constitutions of these legal systems and to show by means of practical examples how the law concretely implements them Accordingly it provides notes on the legal treatment of the topics analysed serving as a practical guide for the study of these matters in the respective jurisdictions This book will be of interest to all students and scholars of labour law looking for an overview of the topics covered in all five jurisdictions

Labour Law and Sustainable Development Valentina Cagnin, 2020-06-05 Labour Law and Sustainable Development is a detailed reconstruction of the regulatory framework and jurisprudential findings of sustainable development at the international European and national level The global crisis of the past decade has underlined the social unsustainability of the ultra liberalistic theories through which the labour law deregulation represents the precondition for social and economic development coherent with the globalization imperatives It is no exaggeration to assert that the existing foundations of labour law have been irreversibly compromised It is essential to find a way out of the crisis at the same time defining the founding values of new sustainable labour law In linking labour law with the sustainability paradigm this provocative book promises to widen the scope and terms of the reconciliation of interests taking into account the multiplicity of the stakeholders interested in economic social and environmental issues and in particular to practise an approach that achieves intergenerational equity What s in this book In an unprecedented comparative study including case law of the network of principles agreements practices and norms concerning sustainable development and its different economic and social implications the author examines such facets as the following sustaining solidarity and equality of opportunity in current and emerging work situations enhancing individual autonomy in the current world of subordinate but independent labour

reconciling personal needs flexible organization of companies and reduction of external and internal costs to companies collective action for the regulation of labour relations allowing for the exercise of individual autonomy involving entire populations that have been so far excluded in the world scene developing a sustainable pension system to promote intergenerational solidarity implementing flexicurity policies positively social clauses of international trade treaties undoing the profound contradiction of gender and wage inequalities and promoting corporate social responsibility The objective of this book is to provide the reader with a reasoning basis to assess whether the choice to elect sustainable development as a new paradigm of reference for labour law is feasible and if in particular this choice can be useful in order to define the founding values of a new sustainable labour law How this will help you Using an interdisciplinary approach the author emphasizes the need to consider the various dimensions of sustainability together not only the original environmental but also the economic and social dimensions This book offers a real strategic leap for both legislators and social actors in particular leading the way to avoiding a fracture of the generational pact that has held together modern societies Although the book presents a profound academic contribution to the analysis of labour law realities and trends it will also be welcomed by corporate lawyers judges human rights experts trade unionists business managers entrepreneurs and consultants interested in the issues of labour sustainable development and social rights

Die italienische Wirtschaftspolitik zwischen Politik und Wirtschaft Gioachino Fraenkel, 2022

Sports Law in Italy Michele Colucci, Giuseppe Candela, Salvatore Civile, Alessandro Coni, 2018-05-15

Derived from the renowned multi volume International Encyclopaedia of Laws this practical analysis of sports law in Italy deals with the regulation of sports activity by both public authorities and private sports organizations The growing internationalization of sports inevitably increases the weight of global regulation yet each country maintains its own distinct regime of sports law and its own national and local sports organizations Sports law at a national or organizational level thus gains a growing relevance in comparative law The book describes and discusses both state created rules and autonomous self regulation regarding the variety of economic social commercial cultural and political aspects of sports activities Self regulation manifests itself in the form of by laws and encompasses organizational provisions disciplinary rules and rules of play However the trend towards more professionalism in sports and the growing economic social and cultural relevance of sports have prompted an increasing reliance on legal rules adopted by public authorities This form of regulation appears in a variety of legal areas including criminal law labour law commercial law tax law competition law and tort law and may vary following a particular type or sector of sport It is in this dual and overlapping context that such much publicized aspects as doping sponsoring and media and responsibility for injuries are legally measured This monograph fills a gap in the legal literature by giving academics practitioners sports organizations and policy makers access to sports law at this specific level Lawyers representing parties with interests in Italy will welcome this very useful guide and academics and researchers will appreciate its value in the study of comparative sports law

Republic Prague MAC EITAI 2020 **The Legal Construction of Personal Work Relations** Mark Freedland FBA, Nicola Kountouris, 2011-12-15 This book explores the conceptual framework of European employment law focusing on understanding the law's construction of employment relationships. The book draws on extensive comparative research of the legal architecture of employment relations in national legal systems and EU law to analyse the traditional model of the contract of employment and the difficulties of using the traditional model to frame modern working relationships. The authors then present a new model of the foundations of employment relationships based on the concept of a personal work nexus and explore the potential of their model to shape the future development of employment law. Throughout the book the authors analyse the interaction of domestic and EU employment law and discuss the possibility of future legal harmonisation in the area. They conclude by exploring the potential for a common framework for European employment law in the context of broader debates surrounding the harmonisation of European private law.
