**Aliens Like Us?** Anthony Aveni, 2025-03-18 In this authoritative accessible and at times funny and irreverent work distinguished anthropologist Anthony Aveni speaks to the trained astrophysicist and the curious layperson alike about a simple but previously unexplored question Why do we assume aliens if they are really out there behave just like us Aveni's newest work departs from the usual scientific treatment of extraterrestrial intelligence by probing the historical and widely neglected anthropological record which offers relevant analogous incidents of contact among terrestrial cultures Beginning with theories of the evolution of life and culture advocated by astrobiologists *Aliens Like Us* explores how the Western cultural imagination is influenced by ways of knowing that are deeply embedded in the minds of the questioners for example how we consider the ownership of property the idea of progress and even the way we classify things The lessons of anthropology offer not only value structures from other cultures that differ profoundly from our

own but also testify to the diverse ways in which alien cultures interact Finally on the question of potential first contact Aveni closes with a fascinating exploration of the image of extraterrestrials in popular culture that is derived in part from the hugely influential realm of science fiction

**Dreams of Other Worlds** Chris Impey, Holly Henry, 2016-04-19 The story of unmanned space exploration from Viking to today Dreams of Other Worlds describes the unmanned space missions that have opened new windows on distant worlds Spanning four decades of dramatic advances in astronomy and planetary science this book tells the story of eleven iconic exploratory missions and how they have fundamentally transformed our scientific and cultural perspectives on the universe and our place in it The journey begins with the Viking and Mars Exploration Rover missions to Mars which paint a startling picture of a planet at the cusp of habitability It then moves into the realm of the gas giants with the Voyager probes and Cassini's ongoing exploration of the moons of Saturn The Stardust probe's dramatic round trip encounter with a comet is brought vividly to life as are the SOHO and Hipparcos missions to study the Sun and Milky Way This stunningly illustrated book also explores how our view of the universe has been brought into sharp focus by NASA's great observatories Spitzer Chandra and Hubble and how the WMAP mission has provided rare glimpses of the dawn of creation Dreams of Other Worlds reveals how these unmanned exploratory missions have redefined what it means to be the temporary tenants of a small planet in a vast cosmos

The People Are Kind Bill R. Douglas, 2024-12-30 What religion the newly opened recently indigenous territory of Iowa would become was a matter of concern to German Lutherans Austrian and French Catholics and New England Congregationalists But their funding proved no match for the myriad of choices Iowans had Methodists were everywhere and Inspirationists Freethinkers and Meskwakis all added to the chorus suggesting that hegemony was not a possibility and cooperation a better strategy Religious Iowans Black Hawk Amelia Bloomer Annie Wittenmeyer James B Weaver Billy Sunday John R Mott Luigi Ligutti Henry A Wallace Ann Landers Harold Hughes and Robert Ray all make appearances How did Sioux City pastor George Haddock get his name on streets in California How did Rev George Slater contribute to civil rights Which state was the go to for journalists looking for an American religious consensus How did Dubuque seminary professors feel about nuclear weapons How did Sr Pat Farrell parry Vatican accusations of heresy The answers to those and many other questions the reader never thought to ask lie within With humor incisive analysis and sympathy Douglas paints a tapestry that contributes not just to religious history but argues for its importance to the history of Iowa

**Japanese Mythology and the Primeval World** Peter Metevelis, 2009-05 The Japanese have faithfully preserved their ancient myths as a connected and well ordered system And as a system Japanese myths say much about the human condition in the cosmos and about the human place in the cosmic order Not until now has a book length English language study been released on Japanese mythology Drawing on his meticulous research Asianist Peter Metevelis presents this selection of analytic essays that form a mosaic of themes on the primordial world of Japanese myth adding a rewarding voice to cultural history and the history of ideas around the world Metevelis shows that contrary to

popular belief Japanese myths have much in common with other myths around the globe and are mythically logically and symbolically equivalent This suggests that Japanese culture has always resonated with the rest of the world and provides a valuable touchstone for comparative mythologists The mythic themes Metevelis explores include Linkage of birth with death Loss of immortality Containment of souls Effect of time on mortals Creation of the cosmos And many more This incomparable volume also includes detailed notes bibliographies and appendices to help further your knowledge of Japanese myth Under Metevelis s expert guidance you can expand your understanding of the Japanese myth system its structure and its principal actors and immerse yourself in the ancient Japanese mysteries of the cosmos *The Earth, the City, and the Hidden*

*Narrative of Race* Carl C. Anthony, 2017-10-16 This book by Carl C Anthony offers a new story about race and place intended to bridge long standing racial divides The long ignored history of African American contributions to American infrastructure and the modern economic system is placed in the larger context of the birth of the universe and the evolution of humanity in Africa The author interweaves personal experiences as an architect planner environmentalist and black American with urban history racial justice cosmology and the challenge of healing the environmental and social damage that threatens the future of humankind Thoughtful writing about race urban planning and environmental and social equity is sparked by stories of life as an African American child in post World War II Philadelphia a student and civil rights activist in 1960s Harlem a traveling student of West African architecture and culture and a pioneering environmental justice advocate in Berkeley and New York This book will appeal to everyone troubled by racism and searching for solutions including individuals exploring their identity and activists eager to democratize power and advance equitable policies in historically marginalized communities This is a rich insightful encounter with an American urbanist with a uniquely expansive perspective on human origins who sets forth what he calls an inclusive vision for a shared planetary future **In the Shadow of Quetzalcoatl** Merilee

Grindle, 2023-11-07 The first biography of Zelia Nuttall 1857 1933 a pioneering Mexican American anthropologist whose work on Aztec cosmology and mastery of ancient codices helped shape our understanding of pre Columbian Mexico Grindle captures the appeal and contradictions of this trailblazing woman who brought a new rigor to the study of ancient civilizations

**Back to the Garden** James H. S. McGregor, 2015-02-10 The garden was the cultural foundation of the early Mediterranean peoples they acknowledged their reliance on and kinship to the land and they understood nature through the lens of their diversely cultivated landscape Their image of the garden underwrote the biblical book of Genesis and the region s three major religions In this important melding of cultural and ecological histories James H S McGregor suggests that the environmental crisis the world faces today is a result of Western society s abandonment of the First Nature principle of the harmonious interrelationship of human communities and the natural world The author demonstrates how this relationship which persisted for millennia effectively came to an end in the late eighteenth century when nature came to be equated with untamed landscape devoid of human intervention McGregor s essential work offers a new understanding of environmental

accountability while proposing that recovering the original vision of ourselves not as antagonists of nature but as cultivators of a biological world to which we innately belong is possible through proven techniques of the past     Stonehenge Clive Ruggles, Amanda Chadburn, 2024-04-03 Stonehenge is one of the most famous ancient monuments in the world and its solar alignment is one of its most important features Yet although archaeologists have learned a huge amount about this iconic monument and its development a sense of mystery continues about its purpose This helps fuel numerous theories and common misconceptions particularly concerning its relationship to the sky and the heavenly bodies A desire to cut through this confusion was the inspiration for this book and it fills a gaping hole in the existing literature The book provides both an introduction to Stonehenge and its landscape and an introduction to archaeoastronomy the study of how ancient peoples understood phenomena in the sky and what role the sky played in their cultures Archaeoastronomy is a specialism critical to explaining the relationship of Stonehenge and nearby monuments to the heavens but interpreting archaeoastronomical evidence has often proved highly controversial in the past Stonehenge Sighting the Sun explains why It makes clear which ideas about Stonehenge are generally accepted and which are not with clear graphics to explain complicated concepts This beautifully illustrated book shines new light on this most famous of ancient monuments and is the first in depth study of this fascinating topic suitable both for specialists and for anyone with a general interest The volume includes a Foreword by British archaeologist and academic Professor Sir Barry Cunliffe     A History of Science in World Cultures Scott L. Montgomery, Alok Kumar, 2015-06-12 To understand modern science it is essential to recognize that many of the most fundamental scientific principles are drawn from the knowledge of ancient civilizations Taking a global yet comprehensive approach to this complex topic A History of Science in World Cultures uses a broad range of case studies and examples to demonstrate that the scientific thought and method of the present day is deeply rooted in a pluricultural past Covering ancient Egypt Mesopotamia India Greece China Islam and the New World this volume discusses the scope of scientific and technological achievements in each civilization and how the knowledge it developed came to impact the European Renaissance Themes covered include the influence these scientific cultures had upon one another the power of writing and its technologies visions of mathematical order in the universe and how it can be represented and what elements of the distant scientific past we continue to depend upon today Topics often left unexamined in histories of science are treated in fascinating detail such as the chemistry of mummification and the Great Library in Alexandria in Egypt jewellery and urban planning of the Indus Valley hydraulic engineering and the compass in China the sustainable agriculture and dental surgery of the Mayas and algebra and optics in Islam This book shows that scientific thought has never been confined to any one era culture or geographic region Clearly presented and highly illustrated A History of Science in World Cultures is the perfect text for all students and others interested in the development of science throughout history     **Handbook of Space Engineering, Archaeology, and Heritage** Ann Darrin, Beth L. O'Leary, 2009-06-26 Some might think that the 27 thousand

tons of material launched by earthlings into outer space is nothing more than floating piles of debris. However, when looking at these artifacts through the eyes of historians and anthropologists instead of celestial pollution, they are seen as links to human history and heritage.

**Space: The New Frontier for Archaeology of the Night** Nancy Gonlin, April Nowell, 2017-12-15

How did ancient peoples experience, view, and portray the night? What was it like to live in the past when total nocturnal darkness was the norm? Archaeology of the Night explores the archaeology, anthropology, mythology, iconography, and epigraphy of nocturnal practices and questions the dominant models of daily ancient life. A diverse team of experienced scholars uses a variety of methods and resources to reconstruct how ancient peoples navigated the night and what their associated daily and nightly practices were. This collection challenges modern ideas and misconceptions regarding the night and what darkness and night symbolized in the ancient world, and it highlights the inherent research bias in favor of daytime archaeology. Numerous case studies from around the world, including Oman, Mesoamerica, Scandinavia, Rome, Great Zimbabwe, Indus Valley, Peru, and Cahokia, illuminate subversive social, ritual, domestic, and work activities such as witchcraft, ceremonies, feasting, sleeping, nocturnal agriculture, and much more. Were there artifacts particularly associated with the night? Authors investigate individuals and groups, both real and mythological, who share a special connection to nighttime life. Reconsidering the archaeological record, Archaeology of the Night views sites, artifacts, features, and cultures from a unique perspective. This book is relevant to anthropologists and archaeologists and also to scholars of human geography, history, astronomy, sensory studies, human biology, folklore, and mythology.

**Peaceful War** Patrick Mendis, 2013-10-18

Peaceful War is an epic analysis of the unfolding drama between the clashing forces of the Chinese dream and American destiny. Just as the American experiment evolved, Deng Xiaoping's China has been using Hamiltonian means to Jeffersonian ends and borrowed the idea of the American Dream as a model for China's rise. The Chinese dream, as reinvented by President Xi Jinping, continues Deng's experiment into the twenty-first century. With a possible fiscal cliff in America and a social cliff in China, the author revisits the history of Sino-American relations to explore the prospects for a return to the long-forgotten Beijing-Washington love affair launched in the trade-for-peace era. President Barack Obama's Asia pivot strategy and the new Silk Road plan of President Xi could eventually create a Pacific New World Order of peace and prosperity for all. The question is: will China ultimately evolve into a democratic nation by rewriting the American Dream in Chinese characters, and how might this transpire?

**Class Not Dismissed** Anthony Aveni, 2014-10-15

In Class Not Dismissed, award-winning professor Anthony Aveni tells the personal story of his six decades in college classrooms and some of the 10,000 students who have filled them. Through anecdotes of his own triumphs and tribulations, some amusing

others heartrending Aveni reveals his teaching story and thoughts on the future of higher education Although in recent years the lecture has come under fire as a pedagogical method Aveni ardently defends lecturing to students He shares his secrets on crafting an engaging lecture and creating productive dialogue in class discussions He lays out his rules on classroom discipline and tells how he promotes the lost art of listening He is a passionate proponent of the liberal arts and core course requirements as well as a believer in sound teaching promoted by active scholarship Aveni is known to his students as a consummate storyteller In *Class Not Dismissed* he shares real stories about everyday college life that shed light on serious educational issues The result is a humorous reflective inviting and powerful inquiry into higher education that will be of interest to anyone invested in the current and future state of college and university education **Dark Skies** Daniel Deudney, 2020-03-02 Space is again in the headlines E billionaires Jeff Bezos and Elon Musk are planning to colonize Mars President Trump wanted a Space Force to achieve space dominance with expensive high tech weapons The space and nuclear arms control regimes are threadbare and disintegrating Would be asteroid collision diverters space solar energy collectors asteroid miners and space geo engineers insistently promote their Earth changing mega projects Given our many looming planetary catastrophes from extreme climate change to runaway artificial superintelligence looking beyond the earth for solutions might seem like a sound strategy for humanity And indeed bolstered by a global network of fervent space advocates and seemingly rendered plausible even inevitable by oceans of science fiction and the wizardry of modern cinema space beckons as a fully hopeful path for human survival and flourishing a positive future in increasingly dark times But despite even basic questions of feasibility will these many space ventures really have desirable effects as their advocates insist In the first book to critically assess the major consequences of space activities from their origins in the 1940s to the present and beyond Daniel Deudney argues in *Dark Skies* that the major result of the Space Age has been to increase the likelihood of global nuclear war a fact conveniently obscured by the failure to recognize that nuclear armed ballistic missiles are inherently space weapons The most important practical finding of Space Age science also rarely emphasized is the discovery that we live on Oasis Earth tiny and fragile and teeming with astounding life but surrounded by an utterly desolate and inhospitable wilderness stretching at least many trillions of miles in all directions As he stresses our focus must be on Earth and nowhere else Looking to the future Deudney provides compelling reasons why space colonization will produce new threats to human survival and not alleviate the existing ones That is why he argues we should fully relinquish the quest Mind bending and profound *Dark Skies* challenges virtually all received wisdom about the final frontier **Moon** Bernd Brunner, 2010-11-18 Using werewolves and Wernher von Braun Stonehenge and the sex lives of sea corals aboriginal myths and an Anglican bishop in this new book the author weaves variegated information into a glimpse of Earth's closest celestial neighbor whose mere presence inspires us to wonder what might be out there Going beyond the discoveries of contemporary science he presents a cultural assessment of our complex relationship with Earth's lifeless rocky satellite As well as offering

an engaging perspective on such age old questions as What would Earth be like without the moon he surveys the moon s mythical and religious significance and provokes existential soul searching through a lunar lens inquiring Forty years ago the first man put his footprint on the moon Will we continue to use it as the screen onto which we cast our hopes and fears Drawing on materials from different cultures and epochs he walks readers down a moonlit path illuminated by more than seventy five vintage photographs and illustrations From scientific discussions of the moon s origins and its chronobiological effects on the mating and feeding habits of animals to an illuminating interpretation of Bishop Francis Godwin s 1638 novel The Man in the Moone his interdisciplinary explorations recast a familiar object in an original light Our Moon Rebecca Boyle,2024-01-18 Longlisted for the National Book Award 2024 Passionate and absorbing SUNDAY TIMES I learned more about the Moon by reading this book than after a lifetime of study CHRIS HADFIELD author of An Astronaut s Guide to Life on Earth Superb as much a feat of imagination as it is a work of globe trotting scholarship TELEGRAPH Boyle s writing shines shifting through time and space science and sentiment a luminous read REBECCA WRAGG SYKES author of Kindred You will never look at the Moon the same way again fascinating NEW STATESMAN A riveting feat of science writing ED YONG author of An Immense World Engrossing INDEPENDENT Every living being throughout history across time and geography has gazed up at the same moon From the first prehistoric life that crawled onto land guided by the power of the tides to the division of time into months and seasons for the first humans the moon has driven the expansion and development of our world It has inspired scientific discovery and culture from the ancient astronomers to the scientific revolution of Copernicus and Galileo from the 1969 Apollo landings to writers and artists and stirred an inexhaustible desire to know where we come from and how we got here And as astronauts around the world prepare to return to the Moon opening up new frontiers of discovery profit and politics Our Moon tells the dazzling story of how the Moon has shaped life as we know it fuelled dramatic change across the globe and could be the key to humanity s future **Maya E Groups** David A.
