Pharmaceutical Technology Nisclair:

Pharmaceutical Calculations Payal Agarwal, 2014-09-12 *Pharmaceutical Calculations* is the perfect text for students or professionals aiming to understand or develop the calculations skills that play a significant role in building a competent pharmacist. This text focuses on basic math fundamentals essential for pharmaceutical calculations followed by calculations that are more specific to compounding and formulation of individual dosage. This helpful approach incorporates solved examples for each individual section followed by practice sets with an answer key to each problem. At the end of each chapter case studies demonstrate the application of mathematical calculations in compounding actual prescriptions. **FEATURES** Practice sets Solved problems Case studies in the form of prescriptions

Herbal Drug Technology Theory and Practical Mr. Rohit Manglik, 2024-07-24 This book covers the standardization evaluation and formulation of herbal medicines merging theory with laboratory procedures for pharmacy courses

Design of Nanostructures for Versatile Therapeutic Applications Alexandru Mihai Grumezescu, 2018-02-03 *Design of Nanostructures for Versatile Therapeutic Applications* focuses on antimicrobial antioxidant and nutraceutical applications of nanostructured materials. Many books discuss these subjects but not from a pharmaceutical point of view. This book covers novel approaches related to the modulation of microbial biofilms antimicrobial therapy and encapsulate polyphenols as antioxidants. Written by an internationally diverse group of academics, this book is an important reference resource for researchers both in biomaterials science and the pharmaceutical industry. Assesses the most recently developed nanostructures that have potential antimicrobial properties explaining their novel mechanical aspects. Shows how nanoantibiotics can be used to more effectively treat disease. Provides a cogent summary of recent developments in nanoantimicrobial discovery allowing readers to quickly familiarize themselves with the topic

Pharmaceuticals in Aquatic Environments Vinod Kumar Garg, Ashok Pandey, Navish Kataria, Caterina Faggio, 2023-11-13 1 Explores the management of the environment through green chemistry 2 Describes phytoremediation technology for decontamination of pharmaceuticals laden water and wastewater 3 Covers the detection methods and quantification of pharmaceutical residues in various contaminated sources 4 Discusses ecotoxicological aspects and risk assessment of pharmaceuticals in the aquatic environment 5 Reviews degradation and treatment technologies including nanotechnology biomaterials biochar

Computer Aided Pharmaceutics and Drug Delivery Vikas Anand Saharan, 2022-05-30 This book examines the role of computer assisted techniques for discovering designing optimizing and manufacturing new effective and safe pharmaceutical formulations and drug delivery systems The book discusses computational approaches statistical modeling and molecular modeling for the development and safe delivery of drugs in humans The application of concepts of QbD Quality by Design DoE Design of Experiments artificial intelligence and in silico pharmacokinetic assessment simulation have been made a lot easier with the help of commercial software and expert systems This title provides in depth knowledge of such useful software with illustrations from the latest researches The book also fills in the gap between pharmaceutics and molecular modeling at micro meso and macro scale by covering topics such as advancements in computer aided Drug Design CADD drug polymer interactions in drug delivery systems molecular modeling of nanoparticles and pharmaceutics bioinformatics This book provides abundant applications of computers in formulation designing and characterization are provided as examples case studies and illustrations Short reviews of software databases and expert systems have also been added to culminate the interest of readers for novel applications in formulation development and drug delivery Computer aided pharmaceutics and drug delivery is an authoritative reference source for all the latest scholarly update on emerging developments in computed assisted techniques for drug designing and development The book is ideally designed for pharmacists medical practitioners students and researchers

Technologie et concurrence - Technology and Competition Josef Drexler, 2009 Hanns Ullrich this highly renowned legal scholar has had a tremendous influence on legal research and the development of the law in the fields of both Technology and Competition His expertise dates back to the late 1970s and early 1980s when he served as a member of the research staff at the Max Planck Institute for Intellectual Property in Munich In 1985 he became professor of law at the Universität der Bundeswehr Munich and finally in 2000 professor at the European University Institute Florence He has acted as visiting professor at a number of Universities around the world including in particular the College of Europe Bruges The authors of the contributions in this book feel greatly indebted to Hanns Ullrich Much earlier than others he recognised and explained that in the absence of pressure from competition intellectual property will not be able to fulfil its mission of enhancing innovation In concentrating on the fields of interest of this eminent scholar the contributions address a number of the most burning issues of the regulation of intellectual property competition law and of course the application of competition law to IP related cases

Medicinal Plants - Recent Advances in Research and Development Hsin-Sheng Tsay, Lie-Fen Shyur, Dinesh Chandra Agrawal, Yang-Chang Wu, Sheng-Yang Wang, 2016-10-25 Since

ancient times plants have been used as a prime natural source of alternative medicines and have played an important role in our lives. The old tradition of medicinal plant application has turned into a highly profitable business in the global market resulting in the release of a large number of herbal products. People have tried to find different sources of medicines to alleviate pain and cure different illnesses. Due to severe constraints of synthetic drugs and the increasing contraindications of their usage, there is a growing interest world over in the usage of natural products based on medicinal herbs; hence there is an ever-expanding market of herbs and herbal-based medicinal preparations all over the world. This has culminated into an exponential increase in number of research groups in different geographical locations and generation of volume of research data in the field in a short span of time. The path-breaking advancement in research methods and interdisciplinary approaches is giving birth to newer perspectives. Therefore, it becomes imperative to keep pace with the advancement in research and development in the field of medicinal herbs. There are a large number of researchers in different parts of the world working on various aspects of medicinal plants and herbal medicines. The idea is to bring their recent research work into light in the form of a book. The proposed book contains chapters by the eminent researchers in different countries and working with different disciplines of medicinal plants. Articles pertain to different disciplines such as 1. Resources and conservation of medicinal plants 2. Biosynthesis and metabolic engineering of medicinal plants 3. Tissue culture propagation and bioreactor technology of medicinal plants 4. Phytochemical research on medicinal plants 5. Herbal medicines and plant-derived agents in cancer prevention and therapy 6. Herbal medicines and plant-derived agents in metabolic syndrome management 7. Herbal medicines and plant-derived agents in modulation of immune-related disorders 8. Herbal medicines and hepatotoxicity. The book will prove itself an asset for the researchers, professionals, and also students in the area of medicinal plants and mechanism of their action.

Information Resources in Toxicology, Volume 2: The Global Arena
,2020-05-15

This new fifth edition of *Information Resources in Toxicology* offers a consolidated entry portal for the study, research, and practice of toxicology. Both volumes represent a unique wide-ranging curated international annotated bibliography and directory of major resources in toxicology and allied fields such as environmental and occupational health, chemical safety, and risk assessment. The editors and authors are among the leaders of the profession sharing their cumulative wisdom in toxicology's subdisciplines. This edition keeps pace with the digital world in directing and linking readers to relevant websites and other online tools. Due to the increasing size of the hardcopy publication, the current edition has been divided into two volumes to make it easier to handle and consult. Volume 1: Background Resources and Tools arranged in 5 parts begins with chapters on the science of toxicology, its history, and informatics framework in Part 1. Part 2 continues with chapters organized by more specific subject such as cancer, clinical toxicology, genetic toxicology, etc. The categorization of chapters by resource format, for example, journals and newsletters, technical reports, organizations, constitutes Part 3. Part 4 further considers toxicology's presence via the Internet, databases, and software tools. Among the

miscellaneous topics in the concluding Part 5 are laws and regulations professional education grants and funding and patents Volume 2 The Global Arena offers contributed chapters focusing on the toxicology contributions of over 40 countries followed by a glossary of toxicological terms and an appendix of popular quotations related to the field The book offered in both print and electronic formats is carefully structured indexed and cross referenced to enable users to easily find answers to their questions or serendipitously locate useful knowledge they were not originally aware they needed Among the many timely topics receiving increased emphasis are disaster preparedness nanotechnology omics risk assessment societal implications such as ethics and the precautionary principle climate change and children s environmental health Opens with an overview of the international toxicology scene organizations and activities involved with both the science and regulatory framework and a specific look at the European Union s efforts Offers an extensive collection of chapters covering over 40 countries and their toxicological infrastructure which includes listings of major books and journals organizations professional societies universities poison control centers legislation and online databases Provides the Second Edition of the International Union of Pure and Applied Chemistry s Glossary of Terms Used in Toxicology a carefully constructed and peer reviewed collation of critical terms in the science Concludes with a potpourri of quotes concerning toxicology and their use in the arts and popular culture Paired with Volume One which offers chapters on a host of toxicology sub disciplines this set offers the most comprehensive compendium of print digital and organizational resources in the toxicological sciences with over 120 chapters contributions by experts and leaders in the field

Veterinary Medicine and Pharmaceuticals Samuel Oppong Bekoe, Reimmel Kwame Adosraku, Mani Saravanan, P K Ramkumar, 2020-03-11 Veterinary pharmaceuticals provide animals with the requisite complete animal health care The availability of safe and good quality medicines in the right amounts is needed in achieving optimum animal health care The economic benefits of animal food products cannot be underestimated Veterinary pharmaceuticals are needed to meet the ever growing demand of animal protein for the human population However their routine and unguarded use play significant roles in many public health issues such as antimicrobial resistance The practices knowledge and awareness needed on the use and application of veterinary pharmaceuticals amongst farmers animal health professionals microbiologists and policy makers remain key in ensuring a safe and healthy food chain for all In the field of veterinary medicine canine practice is a challenge to veterinarians In recent years newer diagnostic methods and therapeutic protocols have been published on a regular basis Along with the existing knowledge of important canine diseases like ascites duodenal disorders pericardial effusions and canine mastitis this book is supplemented with all the latest information Discussion of duodenal disorders in dogs including IBD and SIBO is an important topic in day to day practice Ascites and mastitis in dogs are also important topics and are discussed in this book Each topic carries practical points for the diagnosis and management of important diseases of dogs Hence this book will be very useful for canine practitioners

innovative drugs While drug developing scientists in the 1990s mostly welcomed the transformation into a target based approach two decades of experience shows that this model is failing to boost both drug discovery and efficiency Selected targets were often not druggable and with poor disease linkage leading to either high toxicity or poor efficacy Therefore a profound rethinking of the current paradigm is needed Advances in systems biology are revealing a phenotypic robustness and a network structure that strongly suggest that exquisitely selective compounds compared with multitarget drugs may exhibit lower than desired clinical efficacy This appreciation of the role of polypharmacology has significant implications for tackling the two major sources of attrition in drug development efficacy and toxicity Integrating network biology and polypharmacology holds the promise of expanding the current opportunity space for druggable targets **High**
