Reddy,2021-09-30 This edited book provides knowledge about hemicelluloses biorefinery approaching production life cycle circular economy and valorization by obtaining value added bioproducts and bioenergy A special focus is dedicated to chemical and biochemical compounds produced from the hemicelluloses derivatives platform Hemicelluloses are polysaccharides located into plant cell wall with diverse chemical structures and properties It is the second most spread organic polymer on nature and found in vast lignocellulosic materials from agro and industrial wastes therefore hemicelluloses are considered as abundant and renewable raw material feedstock Biorefinery concept contributes to hemicelluloses production associated with biomass industrial processes Hemicelluloses are alternative sources of sugars for renewable fuels and as platform for chemicals production This book reviews chemical processes for sugar production and degradation obtaining of intermediate and final products and challenges for pentose fermentation Aspects of hemicelluloses chain chemical and enzymatic modifications are presented with focus on physicochemical properties improvement for bioplastic and biomaterial approaches Hemicelluloses are presented as sources for advanced materials in biomedical and pharmaceutical uses and as hydrogel for chemical and medicine deliveries An interdisciplinary approach is needed to cover all the processes involving hemicelluloses its conversion into final and intermediate value added compounds and bioenergy production Covering this context this book is of interest to teachers students researchers and scientists dedicated to biomass valorization This book is a knowledge source of basic aspects to advanced processing and application for graduate students particularly Besides the book serves as additional reading material for undergraduate students from different courses with a deep interest in biomass and waste conversion valorization and chemical products from hemicelluloses **Biointensive Integrated Pest Management in Horticultural Ecosystems** P. Parvatha Reddy,2014-05-08 Through Green Revolution in late 1960s India achieved self sufficiency in food production but still the country has not achieved self sufficiency in production of horticultural crops Most of the growth in food production during the green revolution period is attributed to the use of higher levels of fertilizers and pesticides which are continuing to destroy stable traditional ecosystems The challenge before the crop protection scientist is to increase yields from the existing land without harming the environment and resource base This can be achieved by adopting eco friendly Biointensive Integrated Pest Management BIPM strategy BIPM incorporates ecological and economic factors into agricultural system design and decision making and addresses public

concerns about environmental quality and food safety The benefits of implementing BIPM can include reduced chemical input costs reduced on farm and off farm environmental impacts and more effective and sustainable pest management An ecology based IPM has the potential of decreasing inputs of fuel machinery and synthetic chemicals all of which are energy intensive and increasingly costly in terms of financial and environmental impact Such reductions will benefit the grower and society The present book deals with the most recent biointensive integrated approaches for pest management utilizing components such as bioagents predators parasitoids and pathogens bacteria fungi viruses botanicals biofumigation oil cakes FYM compost crop residues green manuring and other organic amendments arbuscular mycorrhizal fungi physical methods hot water treatment of planting material soil solarization cultural methods crop rotation summer ploughing fallowing intercropping pruning mulching spacing planting date trap cropping etc biorational chemicals pheromones and resistant cultivars This book can serve as a useful reference to policy makers research and extension workers practicing farmers and students The material can also be used for teaching post graduate courses
