Petroleum Refining Design and Applications Handbook, Volume 1 A. Kayode Coker, 2018-07-31 There is a renaissance that is occurring in chemical and process engineering and it is crucial for today's scientists, engineers, technicians and operators to stay current. With so many changes over the last few decades in equipment and processes, petroleum refining is almost a living document constantly needing updating. With no new refineries being built, companies are spending their capital retooling and adding on to existing plants. Ghosh,Mark Prelas,2009-06-17 In the lifetimes of the authors the world and especially the United States have received three
significant wake up calls on energy production and consumption The first of these occurred on October 15 1973 when the
Yom Kippur War began with an attack by Syria and Egypt on Israel The United States and many western countries supported
Israel Because of the western support of Israel several Arab oil exporting nations imposed an oil embargo on the west These
nations withheld five million barrels of oil per day Other countries made up about one million barrels of oil per day but the
net loss of four million barrels of oil production per day extended through March of 1974 This represented 7% of the free
world s i e excluding the USSR oil production In 1972 the price of crude oil was about 3 00 per barrel and by the end of 1974
the price of oil had risen by a factor of 4 to over 12 00 This resulted in one of the worst recessions in the post World War II
era As a result there was a movement in the United States to become energy independent At that time the United States
imported about one third of its oil about five million barrels per day After the embargo was lifted the world chose to ignore
the wake up call and went on with business as usual **Official Gazette of the United States Patent Office** United
