Philosophy Made Simple Popkin Second Edition:

Philosophy Made Simple A. Stroll, R H Popkin, 2012-09-10 *Philosophy Made Simple* will be of particular interest to students beginning degree courses in philosophy and to those who are studying it as an ancillary subject within courses such as sociology education linguistics theology and psychology It will in addition be useful for a variety of liberal arts courses in adult education The book also provides a valuable basis for an introductory self study course Avrum Stroll is Professor of Philosophy at the University of California San Diego USA Richard H Popkin is presently Professor Emeritus Washington University St Louis and Adjunct Professor History and Philosophy at UCLA USA **Berkeley** Damian Ilodigwe, 2020-06-12 Berkeley is popular in the philosophical tradition as the philosopher who denied the existence of matter in favour of spiritual substance His *esse est percipi* thesis is understandably seen as a recipe for subjective idealism While there is a point to this reading of Berkeley it remains to be seen whether it does justice to the full significance of Berkeley's opposition to philosophical materialism In this book essentially a sympathetic reconstruction of Berkeley's philosophy Ilodigwe approaches Berkeley's Immaterialism from the standpoint of the philosophical issues raised by the emergence of modern science in the seventeenth century He argues that when approached in this manner Berkeley's opposition to philosophical materialism not only emerges as an attempt to overcome false abstractions but it also becomes possible to make sense of his claimed alliance with common sense in his battle against philosophical materialism While the realist portrait of Berkeley that emerges from this exercise is not free from difficulties it arguably offers us a fuller conspectus of Berkeley's philosophy of immaterialism

From Truth and truth Francis Etheredge, 2016-01-14 We begin philosophising cf *Fides et Ratio* 3 30 without realising that we are philosophers but in time we discover our own identity as philosophers and at the same time come to critically examine it What therefore is the interrelationship between reason and sense indeed is not sense subtly sensitive through reason Questions then arise out of our life our observations and from what we learn But it is not only about being ready well trained or perfect in our reasoning rather it is about taking up the impulse and the task of seeking the truth On the one hand then we can question everything and end up with nothing but on the other hand there are many points of departure experience maxims and the wisdom which comes through many advisers Prov 15 22 Ideas abound about what might be the case but a philosophical investigation is also about coming into the presence of being Many people have gone before and go with us and will come after us and therefore this book marks a contribution to understanding both the activity of philosophising and the conversation about what is cf *Fides et Ratio* 44 We discover that to exist is to search through the apparent contradictions in our experience and to find eventually that there are both good foundations and buildings begun and also great unanswered or unsatisfactorily answered questions There is an ongoing work too to establish the mystery of the person implicated in human action Therefore there is both the inveterate call of the subject to be investigated and at the same time the ever present need of the grace of perseverance to pursue it This book is also about the slow discovery of the beautiful but

inadequate nature of natural truth The wonder of natural truth is that it exists like the literal sense a kind of foundational reasoning however just as Revelation perfects natural truth so the human person is a living expression of the whole literal and spiritual sense of created being Hence the title of this volume Faithful Reason makes explicit a witness to what is beyond itself

Disinformation Donald A. Barclay,2022-04-15 Does the idea of a world in which facts mean nothing cause anxiety Fear Maybe even paranoia Disinformation The Nature of Facts and Lies in the Post Truth Era cannot cure all the ills of a post truth world but by demonstrating how the emergence of digital technology into everyday life has knitted together a number of seemingly loosely related forces historical psychological economic and culture to create the post truth culture Disinformation will help you better understand how we got to where we now are see how we can move beyond a culture in which facts are too easily dismissed and develop a few highly practical skills for separating truth from lies Disinformation explains How human psychology the very way our brains work can leave us vulnerable to disinformation How the early visions of what a global computer network would and should be unintentionally laid the groundwork for the current post truth culture The ways in which truth is twisted and misrepresented via propaganda and conspiracy theories How new technology not only spreads disinformation but may also be changing the way we think The ways in which the economics of information and the powerful influence of popular culture have contributed to the creation of the post truth culture Unlike the far too numerous one sided politically ideological treatments of the post truth culture Disinformation does not seek to point the finger of blame at any individuals or groups instead its focus is on how a number of disparate forces have influenced human behaviors during a time when all of humanity is struggling to better understand and more effectively control for better or worse challenging new technologies that are straining the limits of human intellectual and emotional capacity
