*Physicalism and Mental Causation* Sven Walter, Heinz-Dieter Heckmann, 2015-11-04 Physicalism the thesis that everything there is in the world including our minds is constituted by basic physical entities has dominated the philosophy of mind during the last few decades But although the conceptual foundations of the physicalist agenda including a proper explication of notions such as causation determination realization or even physicalism itself must be settled before more specific problems e g the problems of mental causation and human agency can be satisfactorily addressed a comprehensive philosophical reflection on the relationships between the various key concepts of the debate on physicalism is yet missing This book presents a range of essays on the conceptual foundations of physicalism mental causation and human agency written by established and leading authors in the field Bibliographie de la philosophie International Institute of Philosophy, 2004 *Physicalism and Mental Causation* Sven Walter, 2004 **Mental Causation** Anthony Dardis, 2008 Two thousand years ago Lucretius said that everything is atoms in the void it s physics all the way down Contemporary physicalism agrees But if that s so how can we how can our thoughts emotions our values make anything happen in the physical world This conceptual knot the mental causation problem is the core of the mind body problem closely connected to the problems of free will consciousness and intentionality Anthony Dardis shows how to unravel the knot He traces its early appearance in the history of philosophical inquiry specifically in the work of Plato Aristotle Descartes and T H Huxley He then develops a metaphysical framework for a theory of causation laws of nature and the causal relevance of properties Using this framework Dardis explains how macro or higher level properties can be causally relevant in the same way that microphysical properties are causally relevant by their relationship with the laws of nature Smelling an orange choosing the orange rather than the cheesecake reaching for the one on the left instead of the one on the right mental properties such as these take their place alongside the physical motor of the world in making things happen **Minds, Causes and Mechanisms** Josep E. Corbi, Josep L. Prades, 2000-02-21 *Minds Causes and Mechanisms* questions the internal consistency of causal physicalism and vindicates a novel approach to mental causation **Can Physicalism Do Justice to Mental Causation?** William Joseph Cooper, Jaegwon Kim, Donald Davidson, Alexander Miller, Jordi Fernandez, Peter Menzies, 2007 **Mental Action and the Conscious Mind** Michael Brent, Lisa Miracchi Titus, 2022-07-15 Mental action deserves a place among foundational topics in action theory and philosophy of mind Recent accounts of human agency tend to overlook the role of conscious mental action in our daily lives while contemporary accounts of the conscious mind often ignore the role of mental action and agency in shaping consciousness This collection aims to establish the centrality of mental action for discussions of agency and mind The thirteen original essays provide a wide ranging vision of the various and nuanced philosophical issues at stake Among the questions explored by the contributors are Which aspects of our conscious mental

lives are agential Can mental action be reduced to and explained in terms of non agential mental states processes or events Must mental action be included among the ontological categories required for understanding and explaining the conscious mind more generally Does mental action have implications for related topics such as attention self knowledge self control or the mind body problem By investigating the nature scope and explanation of mental action the essays presented here aim to demonstrate the significance of conscious mental action for discussions of agency and mind Mental Action and the Conscious Mind will be of interest to scholars and graduate students working in philosophy of mind philosophy of action and philosophy of agency as well as to philosophically inclined cognitive scientists     Action and Interaction Jonathan Robert

Gunderson,2003     **The Metaphysics of Action** David-Hillel Ruben,2018-06-25 In this book the author provides an account of three central ideas in the philosophy of action trying to act acting or doing and one s action causing further consequences In all three cases novel theories of these phenomena are offered trying to act is not a particular mental or physical act but can be explained using conditionals that action is not the same as causing something to happen and in the case of a special but important subset of actions for example the opening of a window the action is identical to the event of the window s opening A result of this last account is that it places actions out in the world sometimes far removed in time and space from the actor s body The world is full of action actions do not just exist in the many little islands of space and time that all of our bodies inhabit In the final chapter Ruben describes and discusses a skeptical challenge to the idea that we can ever know whether or not someone else has acted rather than just passive events having happened to that person     Mental Actions Lucy O'Brien,Matthew Soteriou,2009 The twelve specially written essays in this volume investigate the neglected topic of mental action and show its importance for the metaphysics epistemology and phenomenology of mind The essays investigate what mental actions are how we are aware of them and what is the relationship between mental and physical action

*Causing Actions* Paul M. Pietroski,2000 Paul Pietroski defends a dualist view of the mind body problem Central to his account is his proposed treatment of ceteris paribus laws their role in explanation and how such laws are related to singular causal claims
