is our pleasure to present to you the proceedings of the fourth International Conference on Evolvable Systems From Biology to Hardware ICES 2001 held in Tokyo Japan on 3-5 October 2001 addressing the latest developments and discussing challenges facing the field of evolvable systems. The idea of evolving machines whose origins can be traced back to the cybernetics movement of the 1940s and the 1950s has recently re-emerged in the form of the nascent field of bio-inspired systems and evolvable hardware. Following the workshop Towards Evolvable Hardware which took place in Lausanne Switzerland in October 1995 the First International Conference on Evolvable Systems From Biology to Hardware ICES96 was held at the Electrotechnical Laboratory MITI Tsukuba Japan in October 1996. The second and the third International Conferences on Evolvable Systems From Biology to Hardware ICES98 and ICES 2000 were respectively held in Lausanne in September 1998 and in Edinburgh in April 2000. Following the success of these past events ICES 2001 was dedicated to the promotion and advancement of all aspects of evolvable systems including hardware software algorithms and applications. By bringing together researchers who use biologically inspired concepts to implement real systems in artificial intelligence artificial life robotics VLSI design and related domains ICES 2001 reunited this burgeoning community.
