Pitch Yourself Bill Faust, Michael Faust, 2006 The most effective CV you'll ever write The best interview you'll ever give This revolution in the way we sell ourselves in CV and at interview is based on the Elevator Pitch concept and has now been endorsed and recommended by over 40 of the world's leading business schools and universities from Kellogg to Columbia in the US from Insead to London Business School in Europe and from Otago to Sydney in Asia Pacific The Elevator Pitch prioritises who you are and how you work the qualities that you are employed for rather than what you did and where you worked your past which is the emphasis of a traditional CV The Elevator Pitch shifts the focus from your perspective to the employer's perspective and from the past to the future It's a way of presenting yourself that makes more sense to the employer and allows you to sell yourself more effectively It's a way of writing a CV and preparing for interview that will vastly increase your chances of getting the job Employers now are focused very much on competencies as a way of deciding who to employ This is the book that shows you have to bring your competencies to the forefront In a time when there are far more graduates than top class graduate jobs standing out from the crowd is vital This is the book to show you how The second edition incorporates feedback from the authors' global seminar and lecture program meetings with careers advisors at these institutions as well as helping hundreds of people create their job winning CVs **How to Pitch Your Startup to Investors**

Will I Live Tomorrow? Sonia Nassery Cole, 2012-10-16 When Sonia Nassery Cole set out to film *The Black Tulip* in her homeland of Afghanistan, she knew the odds were against her. She was told time and time again that filming inside a war zone would be impossible. What she didn't anticipate was how intent the Taliban and its sympathizers were on halting the film's production. The crew encountered extortion, government corruption, kidnapping attempts, and death threats even with around-the-clock security. Her cinematographer fled after two days, and many others followed. After 9/11, Cole wrote *The Black Tulip* based on a true story of a real Afghan family. The plot was simple: After 2001, when the Taliban was routed, an Afghan family opened *The Poet's Corner*, a restaurant with an open microphone for all to read poetry, perform music, and tell their stories. But the Taliban didn't approve, and the family's new-found hope proved fleeting as it struggled to maintain the restaurant and its vibrant way of life. Selected as Afghanistan's official submission for the Best Foreign Language Film at the 2010 Academy Awards, *The Black Tulip* is a modern portrait of Afghanistan that captures the plight and resilience of its people. Without financial support from a studio or anyone else, Cole self-financed the film by mortgaging her home and selling her belongings. Then, with everything on the line, she left for Kabul to make the impossible possible and set out to gather the right people who would risk their lives and willingly be part of the production. In *Will I Live Tomorrow*, Cole gives an intimate look into what went on behind the scenes of making a controversial film in the heart of a war-ravaged country, the looming terror the Taliban creates among Afghans everywhere, and the challenges and fear the cast and crew faced every day. *Will I Live Tomorrow* is a memoir about one woman's struggle to make a difference in a violent world.

Professional PHP5 Ed Lecky-Thompson, Heow Eide-Goodman, Steven D. Nowicki, Alec Cove, 2007-01-29 What is this book about? With the release of PHP 5 and the Zend Engine 2, PHP finally graduates from its earliest days as a lightweight scripting syntax to a powerful object-oriented programming language that can hold its own against the Java and .NET architectures that currently dominate corporate software development. This book has a pragmatic focus on how to use PHP in the larger scheme of enterprise-class software development. What does this book cover? Unlike Java or .NET, there is little discussion of the application of design patterns, component architectures, and best practices to the development of applications using PHP. Software written in the absence of this sort of higher-order architecture will never be able to match the robust frameworks that Java and .NET ship with out of the box. This book addresses this issue by covering the following material: Part 1 discusses

the OO concepts that were initially explored in Beginning PHP 5 and a demonstration of how to implement them in PHP 5. This section also covers UML modeling and provides a brief introduction to project management techniques that are covered in more depth in Part 4. Parts 2 and 3 present objects and object hierarchies that when completed comprise a robust toolkit that developers will be able to reuse on future projects. These chapters are designed to arm the professional PHP developer with the sort of constructs that are available out of the box with platforms such as Java and .NET from simple utility classes like Collection and Iterator to more complex constructs like Model View Controller architectures and state machines. Part 4 shows how to use the toolkit from Parts 2 and 3 to create real world applications. We look at the development of a robust contact management system that will leverage the componentry and concepts already discussed and introduce project management and software architecture concepts that enable developers to accurately identify business requirements, design scalable, extensible platforms and handle change management effectively. It covers the waterfall and spiral project management paradigms and includes a discussion on eXtreme Programming and other approaches to software development. The Appendices include an extended discussion on the effective use of CVS, introduce the Zend Studio IDE and related tools and discuss performance tuning and scalability.
