ABSTRACT

This study aims to determine the economic value of mangrove forest tourism objects in the Prosperous Nelayan Village, Sumber Jaya Village, Kampung Melayu Sub-district Basi Island, Bengkulu City through economic instruments, namely the Travel Cost Method (TCM) and Willingness to Pay (WTP) along with the variables that influence it and to determine the potential for development based on visitor perceptions. The number of respondents in this study were 50 people. Estimation of economic value is based on the Travel Cost Method, while the factors that influence Willingness to Pay are analyzed using multiple linear regression. Furthermore, the potential for tourism object development is studied descriptively based on the respondents' perceptions. The results showed that the economic value of the mangrove forest tourist attraction Kampung Nelayan Sejahtera based on the total travel costs of 50 respondents during 7 weeks of observation was Rp. 5,088,000. The factors that influence the Willingness to Pay for the Mangrove Forest tour of Kampung Nelayan Sejahtera are the total cost of the trip, the age of the respondent, and income. Total travel costs and age have a negative effect on Willingness to Pay, while income has a positive effect on Willingness to Pay. Potential developments that can be carried out are (1) development of all potential natural resources in the Kampung Sejahtera Mangrove Forest such as natural mangrove forest views, biodiversity and community friendliness and culture by building cooperation between the community and all competent parties, (2) Packaging the offered tourist objects with a tourism promotion package to attract visitors from outside the City of Bengkulu, and (3) increasing the construction of tourist facilities, facilities and infrastructure that are urgently needed by tourists/visitors and making improvements to existing infrastructure facilities, having damaged.

Keywords : *Economic value, travel cost method, willingness to pay*

PENDAHULUAN

Provinsi Bengkulu secara geografis berada pada 2°16'9"—3°31'17" LS dan 101°1'0"—103°41'5" BT, yang terletak di Pantai Barat Pulau Sumatera dengan panjang garis pantai mencapai kurang lebih 525 km dan berhadapan langsung dengan Samudera Hindia. Kondisi tersebut membuat gelombang laut langsung menghantam pantai dan mengakibatkan laju abrasi yang tinggi. Tetapi, di sepanjang pesisir Provinsi Bengkulu dapat dijumpai ekosistem hutan pantai termasuk ekosistem hutan mangrove. Ekosistem mangrove memiliki fungsi yang sangat kompleks dari segi fisik, ekologi, ekonomi dan sosial budaya antara lain fungsi fisik sebagai peredam gelombang laut, angin badai, penahan lumpur, pengikat sedimen, dan pelindung pantai dari proses abrasi. Fungsi ekologi sebagai penghasil detritus, tempat pencahayaan (*growing ground*), tempat pengasihan (*nursery ground*) dan tempat mencari makan (*feeding ground*) bagi biota laut tertentu. Fungsi ekonomi berpotensi sebagai

tempat rekreasi dan mata pencarian bagi masyarakat sekitar sedangkan fungsi sosial-budaya sebagai areal pengembangan budaya, konservasi, dan pendidikan (Kusmana, 2012). Artinya, dengan adanya kawasan mangrove dapat menjaga dan menstabilkan garis pantai dan tepian sungai dari hempasan dan arus.

Ekosistem hutan mangrove di Kota Bengkulu tidak begitu banyak. Letaknya terpencar-pencar, tidak pada suatu hamparan yang luas. Penyebaran hutan mangrove di wilayah Kota Bengkulu diemkan di Kawasan TWA (Objek wisata) Pantai Panjang, Darun Kandang, Pulau Basi, Padang Sersi dan Sungai Jenggah. Luas total TWA ini berdasarkan Surat Keputusan Menteri Kehutanan No.420/Kpts-II/1999 tentang Penunjukkan Kawasan Hutan di Wilayah Provinsi Bengkulu sebesar 920.964 hektar, dengan luas TWA Pantai Panjang dan Pulau Basi 967,20 hektar. Kawasan ini termasuk ke dalam kelompok kawasan pelestarian alam dan merupakan salah satu kawasan konservasi di Provinsi Bengkulu.

Potensi Dan Pengembangan Objek Wisata Kampung Nelayan
