Artificial Neural Network And Power System Harmonics Detection DR. DHARMENDRA KUMAR SINGH, Preface The objective of this book is to introduce an artificial neural network based solution for the problem of measuring the actual amount of harmonics injected into a power network by an individual nonlinear load In this modern

era the demand for electrical and electronics system has increased so much that it has become very hard to do without it. Now a day a smooth life cannot be expected without electrical energy. Today electrical and electronic devices are used in every area may it be homes offices markets traffic education health service defence communication sports industries etc. In recent years neural network has got special attention by the researchers because of its simplicity learning and generalization ability and it has been applied in the field of engineering. The theory of neural network is becoming more and more mature and is also making certain breakthrough progress in various fields. It has the advantages of parallel information processing learning distribution patterns and memory which can be used in the measurement of the harmonic to construct an appropriate network. The book is intended to provide a compressive knowledge in the field of power system harmonics source of harmonics power quality and artificial neural network. The students of both undergraduates and postgraduates college will find the book quite simple and informatics. A number of colleagues and friends of author have contributed significantly through their constructive criticism in the evolution and preparation of the book manuscript.
