Dynamic Educator Preparation Landscape centers on the experiences of a variety of preparation programs all accredited by the Association for Advancing Quality in Educator Preparation AAQEP each unique in its approach to addressing the needs of its prospective teachers and its local school partners The featured programs include public and private preparation providers from across the nation some based in longstanding institutions of higher education some operating in newer organizational models They share a common claim to quality through having met the same accreditation standards yet each excels in its own right in addressing specific needs The book shows that while qualities can be shared quality is fundamentally a divergent rather than a convergent characteristic and that program evaluation and accreditation regimes be framed accordingly It argues that educational policy needs to be based on an appreciation of the many dimensions of quality program practice that are needed to address the varied and particular needs of schools communities and populations that are entering the educator preparation pipeline So long as we are able to ensure that all pathways into teaching result in the preparation of effective educators who are able to serve students schools families and communities well by promoting student learning and thriving we will reap the benefits of this new varied and dynamic landscape of educator preparation Perfect for courses such as Educational Program Evaluation Teacher Education Education Policy Teacher Education Policy and Human Resources in Education **Journal of Education** ,1899 Becoming Rwandan S. Garnett Russell,2019-10-11

In the aftermath of the genocide the Rwandan government has attempted to use the education system in order to sustain peace and shape a new generation of Rwandans Their hope is to create a generation focused on a unified and patriotic future rather than the ethnically divisive past Yet the government s efforts to manipulate global models around citizenship human rights and reconciliation to serve its national goals have had mixed results with new tensions emerging across social groups Becoming Rwandan argues that although the Rwandan government utilizes global discourses in national policy documents the way in which teachers and students engage with these global models distorts the intention of the government resulting in unintended consequences and undermining a sustainable peace **The West Virginia School Journal** ,1882 **17**
