Night Ride And Sunrise Stanley Schmidt, 2017-05-01 The Last Thing They Expected Was First Contact It s long ago been settled that humanity is all alone in the universe All the centuries of searches for extra terrestrial intelligence have turned up exactly nothing at all And when humanity s first and only colony in another star system was recently invaded it was by unwanted human interlopers from Earth interlopers calling themselves The Fruitful who are sure that God himself is guiding them The new arrivals caused trouble enough that many of the original settlers have packed up and moved elsewhere on the planet only to discover some

very alarming signs that the first settlers aren't quite so alone as they thought. Phil Bertrand and Hazel Castagna had striven for years to reach and settle their new world only to find themselves on different sides when the Fruitful arrived and forced hard choices on everyone. Now without quite intending it, they have become allies again as well as the half-unwilling leaders of a group that must find a way to protect humans from aliens and perhaps aliens from humans. But exactly who and what are the aliens?

Faint Echoes, Distant Stars Ben Bova, 2009-10-13 Our neighboring planets may have the answer to this question. Scientists have already identified ice caps on Mars and what appear to be enormous oceans underneath the ice of Jupiter's moons. The atmosphere on Venus appeared harsh and insupportable of life composed of a toxic atmosphere and oceans of acid until scientists concluded that Earth's atmosphere was eerily similar billions of years ago. An extraterrestrial colony in some form may already exist just awaiting discovery. But the greatest impediment to such an important scientific discovery may not be technological but political. No scientific endeavor can be launched without a budget and matters of money are within the arena of politicians. Dr. Ben Bova explores some of the key players and the arguments waged in a debate of both scientific and cultural priorities showing the emotions, the controversy, and the egos involved in arguably the most important scientific pursuit ever begun.

The Mammoth Book of Extreme Science Fiction Mike Ashley, 2010-07-31 Here are 25 stories of science fiction that push the envelope by the biggest names in an emerging new crop of high-tech futuristic SF including Charles Stross, Robert Reed, Alastair Reynolds, Peter Hamilton, and Neal Asher. High-tech SF has made a significant comeback in the last decade as bestselling authors successfully blend the super-science of hard science fiction with real characters in an understandable scenario. It is perhaps a reflection of how technologically controlled our world is that readers increasingly look for science fiction that considers the fates of mankind as a result of increasing scientific domination. This anthology brings together the most extreme examples of the new high-tech far future science fiction pushing the limits way beyond normal boundaries. The stories include *A Perpetual War Fought Within a Cosmic String*, *A Weapon That Could Destroy the Universe*, *A Machine That Detects Alternate Worlds and Creates a Choice of Christs*, *An Immortal Dead Man Sent To The End of the Universe*, *Murder in Virtual Reality*, *A Spaceship So Large That There is an Entire Planetary System Within It*, and *An Analytical Engine At The End of Time* and *Encountering the Untouchable*.

Through Struggle, the Stars John J. Lumpkin, 2011-08-26 In 2139 a network of artificial wormholes has allowed humanity to reach nearby stars where nations fiercely compete to settle new colony worlds. War is imminent between Earth's top powers, China and Japan, for reasons that no one entirely understands. Neil Mercer, a freshly commissioned officer in the United States Space Force, is assigned to shepherd a senior spy on a covert mission that risks drawing America into the conflict. In a story featuring high-adventure interstellar intrigue and some of the most scientifically realistic space combat depicted in fiction, Neil and his comrades must face difficult questions about duty, citizenship, and national interest as they struggle to discover why the war threatens to engulf every nation on Earth.
