*Computers and the Teaching of Writing in American Higher Education, 1979-1994* Gail E. Hawisher, 1996 This book is a history composed of histories Its particular focus is the way in which computers entered and changed the field of composition studies a field that defines itself both as a research community and as a community of teachers This may have a somewhat sinister suggestion that technology alone has agency but this history made of histories is not principally about computers It is about people the teachers and scholars who have adapted the computer to their personal and professional purposes From the authors perspectives change in technology drives changes in the ways we live and work and we agents to a degree in control of our own lives use technology to achieve our human purposes

REVIEW This book reminds those of us now using computers to teach writing where we have been and it brings those who are just entering the field up to date More important it will inform administrators curriculum specialists and others responsible for implementing the future uses of technology in writing instruction

**Computers and Composition Teaching in the 21st Century** Joanne Pauley, 1995 Among the issues facing teachers as the 21st century approaches are the prevalence of violence growing racial and socioeconomic divisions in society and lack of parental involvement Activities gathered from articles in educational journals are suggested to help children voice their experiences thoughts and concerns about violence Some of these activities are inviting a police representative to visit the classroom having children become aware of violence on a favorite television program and then rewriting the show without violence and helping children feel safe by assisting them in writing the names of people and places to which they can go when feeling scared Teachers must be aware of not passing on cultural stereotypes while elementary school children are not able to conceptualize socioeconomic differences in terms of profession and status in the current consumer oriented world the advantages of wealth and disadvantages of poverty soon become evident to them Also teachers should learn as much as possible about the dynamics of their communities and recognize the messages that children are absorbing in their daily experience Suggestions for promoting parental involvement include recruiting a volunteer to become a liaison between teacher and parents showing respect for parents by treating them as co workers rather than as free help asking for parents input and thanking them for their participation
