**Pathology of the Maxillofacial Bones** Pieter Slootweg, 2015-06-15 This book is divided into 3 main sections cysts and odontogenic tumors lesions related to the dentition fibro osseous lesions and giant cell lesions which are unique to the maxillofacial skeleton and bone lesions which also occur in other parts of the body Individual diseases are described with a special emphasis on histomorphological aspects Some lesions may pose considerable diagnostic problems due to shared microscopical features and the authors aim is to provide reliable diagnostic guidelines for the surgical pathologist who has to deal with specimens from this area The majority of the currently available textbooks on head and neck pathology are mainly devoted to soft tissue lesions paying less attention to the pathology of the diseases that involve the hard tissues Texts on general skeletal pathology cannot address this gap as the maxillofacial skeleton differs from the bones elsewhere in the body in several respects Therefore the book discusses both bone disorders that are restricted to the head and neck and diseases that also occur in the extracranial skeleton

**Evidence-Based Oncology** Christopher B. Williams, 2008-04-15 This is a book about using the best evidence to inform treatment decisions for people with cancer It is written by oncologists for oncologists using examples throughout to illustrate key points The book starts off with a toolbox section written in a way which will help those relatively new to the principles of evidence based oncology to understand the key issues and equip them with the basics of how to tell a good study from a bad one The majority of the book then deals with an evidence based summary of the common and important cancers in a structured and easy to read format around common patient scenarios and frequently asked questions Whilst most of the evidence is based on randomised controlled trials other studies are cited where appropriate eg when discussing adverse events The unique accompanying book website will contain updates of new chapters and studies as they become available Written by leading world figures in the evidence based movement Includes free CD ROM with PC eBook and sample PDA chapter Methodology of reviewing and appraising evidence discussed in the context of cancer management Clinical sections

covering prevention and screening Chapters on treatment of the individual major cancers review the current best available evidence to most frequently asked questions Rigorously structured explicit searches evidence of efficacy and harms plus comment around clinical scenarios Free access update website keeping the text current and live [www.evidbasedoncology.com](http://www.evidbasedoncology.com)
