A History of the Aviation Industry in Latin America Diego Barría Traverso, 2024-08-30 This book analyzes both the Chilean state policies on commercial aviation and the corporate history of the state owned airline Linea Aerea Nacional LAN between 1929 and 1989 The book covers a transition from the early adoption of policies that were nationalist from both the national security and economic standpoints through the complete deregulation of the skies and the sale of the state airline to foreign capital Both processes were implemented by army officers Carlos Ib ez del Campo and Augusto Pinochet respectively It shows that LAN's corporate development was marked by the construction of a national aviation paradigm that albeit initially characterized by a clear definition of nationalism with the state as preeminent was far from static over time As from 1929 the role of the state airline as both a transport service provider and an instrument of public policy was subject to review This was due in part to Chile's political dynamics in the twentieth century in terms of matters such as the level of consensus dissent about the development model and the role of the state SOEs and the private sector in the economy It also reflected trends in

the commercial airline industry globally technological advances and as from the 1970s pressures to liberalize the sector

The IMLI Treatise On Global Ocean Governance David Joseph Attard, Malgosia Fitzmaurice, Alexandros Ntovas, 2018-07-04 The 1982 United Nations Convention on the Law of the Sea UNCLOS remains the cornerstone of global ocean governance However it lacks effective provisions or mechanisms to ensure that all ocean space and related problems are dealt with holistically With seemingly no opportunity for revision due to the Conventions burdensome amendment provisions complementary mechanisms dealing with such aspects of global ocean governance including maritime transport fisheries and marine environmental sustainability have been developed under the aegis of the United Nations and other relevant international organizations This approach is inherently fragmented and unable to achieve sustainable global ocean governance In light of the Sustainable Development Goals SDGs particularly Goal 14 the IMLI Treatise proposes a new paradigm on the basis of integrated and cross sectoral approach in order to realise a more effective and sustainable governance regime for the oceans This volume focuses on the role of the UN Specialized Agencies towards the development of effective and sustainable ocean governance by looking at the more elaborate mechanisms they developed in order to achieve the desired objectives laid down in UNCLOS From FAO to UNODC the volume examines how they ensure sustainable development and how much coordination exists among them
