Uncertainty Quantification and Model Calibration Jan Peter Hessling, 2017-07-05 Uncertainty quantification may appear daunting for practitioners due to its inherent complexity but can be intriguing and rewarding for anyone with mathematical ambitions and genuine concern for modeling quality Uncertainty quantification is what remains to be done when too much credibility has been invested in deterministic analyses and unwarranted assumptions Model calibration describes the inverse operation targeting optimal prediction and refers to inference of best uncertain model estimates from experimental calibration data The limited applicability of most state of the art approaches to many of the large and complex calculations made today makes uncertainty quantification and model calibration major topics open for debate with rapidly growing interest from both science and technology addressing subtle questions such as credible predictions of climate heating

**Phytoplankton Pigments** Suzanne Roy, Carole A.

Llewellyn, Einar Skarstad Egeland, Geir Johnsen, 2011-10-27 Pigments act as tracers to elucidate the fate of phytoplankton in the world's oceans and are often associated with important biogeochemical cycles related to carbon dynamics in the oceans. They are increasingly used in in situ and remote sensing applications detecting algal biomass and major taxa through changes in water colour. This book is a follow up to the 1997 volume *Phytoplankton Pigments in Oceanography* UNESCO Press. Since then there have been many advances concerning phytoplankton pigments. This book includes recent discoveries on several new algal classes particularly for the picoplankton and on new pigments. It also includes many advances in methodologies including liquid chromatography mass spectrometry LC MS and developments and updates on the mathematical methods used to exploit pigment information and extract the composition of phytoplankton communities. The book is invaluable primarily as a reference for students, researchers and professionals in aquatic science, biogeochemistry and remote sensing.
