Essential Programming for the Technical Artist Chris Roda, 2024-05-17 This book is based on a successful curriculum designed to elevate technical artists with no programming experience up to essential programming competency as quickly as possible. Instead of abstract theoretical problems, the curriculum employs familiar applications encountered in real production environments to demonstrate each lesson. Written with artists in mind, this book introduces novice programmers to the advantageous world of Python programming with relevant and familiar examples. Any digital artists, not just technical artists, will find this book helpful in assisting with day-to-day production activities. Concentrating upon subjects relevant to the creation of computer graphic assets, this book introduces Python basics, functions, data types, object-oriented programming, exception handling, file processing, graphical user interface creation, PEP 8 standards, and regular expressions. Programming within the SideFX Houdini 3D animation software provides a familiar environment for artists to create and experiment with the covered Python topics.

The Way to a Cowboy's Heart Vicki Lewis Thompson, 2021-09-17 Out of the frying pan into the fire: Matthew Tredway's international reputation as a horse trainer lands him a short-term gig at the Last Chance Ranch. Because his stay is brief, the wranglers nominate him to inform cook Aurelia Smith that she's serving French cuisine they can barely choke down. But one step into Aurelia's kitchen and Matt's blasted with the heat of an attraction he can't resist. Aurelia's willing to shift gears, especially if it includes getting cozy with a sexy cowboy. Temporarily. Clearly, he's reluctant to leave, and she would love him to stay. But his high-powered career demands that he must move on. That's the way the cookie crumbles. And two hearts break.
