Contest without Winners Kate Phillippo,2019-03-19 Seeing the consequences of competitive school choice policy through students eyes While policymakers often justify school choice as a means to alleviate opportunity and achievement gaps an unanticipated effect is increased competition over access to coveted high performing schools In A Contest without Winners Kate Phillippo follows a diverse group of Chicago students through the processes of researching applying to and enrolling in public high school Throughout this journey students prove themselves powerful policy actors who carry out and redefine competitive choice Phillippo s work amplifies the voices of students rather than the parents educators public intellectuals and policymakers who so often inform school choice research and investigates how students interact with and emerge from competitive choice academically developmentally and civically Through students experiences she shows how competitive choice legitimates and exacerbates existing social inequalities collides with students developmental vulnerability to messages about their ability merit and potential and encourages young people s individualistic actions as they come to feel that they must earn their educational rights From urban infrastructure to income inequality to racial segregation Phillippo examines the factors that shape students policy enactment and interpretation as policymakers and educators ask students to compete for access to public resources With competitive choice even the winners the lucky few admitted to their dream schools don t outright win A Contest without Winners challenges meritocratic and market driven notions of opportunity creation for young people and raises critical questions about the goals we have for public schooling Economics for the IB Diploma Revision Guide Paul Hoang,2014-03-28 Ensure students can aim for their best grade with the help of accurate and accessible notes

Bastin Jerome, 2018-04-02 The book Take Off The Blossoms of Women Empowerment plays an important role in the area of focusing on empowerment upliftment enrichment and why not entrepreneurial enterprise owned by blossoming women of today The empowerment of women is essential to development of nation and particularly for the reduction of poverty in real terms Today women empowerment takes place in all levels through SHGs entrepreneurship business enterprise inclusion of Information Technology globalised scenario and informal sectors The blossoms of women empowerment reached frontiers of political economic social and total personality of an individual This book comprises achievement and participation of women from all walks of life This book reiterates the famous saying of Kofi Annan There is no tool for development more effective than the empowerment of women This book enhances the readers to realise the inherent potentials of women belonging to different sectors *Rentier Islamism* Courtney Freer, 2018-03-01 While scholars have long looked at the role of political Islam in the Middle East it has been assumed that domestic politics in the wealthy monarchical states of the Arabian Gulf so called rentier states where taxes are very low and oil wealth subsidizes the needs of citizens are largely unaffected by such movements However the long accepted rentier theory has been shortsighted in overlooking the socio political role played by Muslim Brotherhood affiliates in the super rentiers of Kuwait Qatar and the United Arab Emirates While rentier state theory assumes that citizens of such states will form opposition blocs only when their stake in rent income is threatened this book

demonstrates that ideology rather than rent have motivated the formation of independent Islamist movements in the wealthiest states of the region In the monarchical systems of Qatar and the UAE Islamist groups do not have the opportunity to compete for power and therefore cannot use the ballot box to gain popularity or influence political life as they do elsewhere in the Middle East But as this book points out the division between the social and political sectors is often blurred in the socially conservative states of the Gulf as political actors operate through channels that are not institutionalized Simply because politics is underinstitutionalized in such states does not mean that it is underdeveloped the informal realm holds considerable political capital As such the book argues that Brotherhood movements have managed to use the links between the social i e informal personal networks and political i e government institutions to gain influence in policymaking in such states Using contemporary history and original empirical research Courtney Freer updates traditional rentier state theory and argues that political Islam serves as a prominent voice and tool to promote more strictly political and often populist or reformist views supported by many Gulf citizens
