Case Studies in Infectious Disease Peter Lydyard, Michael Cole, John Holton, Will Irving, Nino Porakishvili, Pradhib Venkatesan, Kate Ward, 2021-04-25 *Case Studies in Infectious Disease* presents forty case studies featuring the most important human infectious diseases worldwide. Written for students of microbiology and medicine, this book describes the natural history of infection from point of entry of the pathogen through pathogenesis, followed by clinical presentation, diagnosis and treatment. Five core sets of questions are posed in each case: What is the nature of the infectious agent? how does it gain access to the body? what cells are infected and how does the organism spread? What are the host defense mechanisms against the agent and how is the disease caused? What are the typical manifestations of the infection and the complications that can occur? How is the infection diagnosed and what is the differential diagnosis? How is the infection managed and what preventative measures can be taken to avoid infection? This standardized approach provides the reader with a logical basis for understanding these diverse and medically important organisms, fully integrating microbiology and immunology throughout. *Case Studies in Infectious Disease: Staphylococcus Aureus* Peter Lydyard, Michael Cole, John Holton, Will Irving, Nino Porakishvili, Pradhib Venkatesan, Kate Ward, 2009-12 *Case Studies in Infectious Disease: Staphylococcus aureus* presents the natural history of this infection from point of entry of the pathogen through pathogenesis, clinical presentation, diagnosis and treatment. A set of core questions explores the nature, causation, host response, manifestations and management of this infectious process. This case also includes summary bullet points, questions and answers, and references.
