Evolving Ourselves Juan Enriquez, Steve Gullans, 2015-11-05 If Darwin were alive today he would likely recognize that technology has evolved so far and so fast that the origin evolution and future of life itself is no longer just driven by natural selection and random mutation Why are genetic conditions like autism asthma and allergies on the rise at unprecedented biologically impossible speeds What traits does our world select for and what does that mean for us Will our children be a different species Today s humans have altered the nature of our world so much and developed such profound capabilities for re crafting our bodies and environment that random mutation and natural selection are no longer the primary determinants of which species survives and how they change over time The nature of the evolution of our world is now increasingly defined and driven by Un Natural Selection where the traits being selected for have little to nothing to do with our ability to survive and thrive and Non Random Mutation in which drastic changes to our environment wreak havoc on what gene are expressed and passed down Evolving Ourselves is the story of how our massive human perturbation and increasingly our specific designs and desires are altering life on Earth It is a chronicle of where our remarkable new capabilities for altering our bodies other living creatures and our environment are taking us in the near term and introduces the possibility that we might cause our own extinction in the long run

Evolution and Ungodly Ways Gary Lassiter,2013-02 For 150 years numerous groups of Christians have disparaged the theory of evolution With a variety of critical statements which they assure are honest sensible and correct they have succeeded in instructing generations of Christians with an anti evolution world view This book presents a different perspective that Christian anti evolution does not defend Christianity it destroys it In terms anyone can understand the most prominent anti evolution claims are disassembled and exposed But unlike other works on this topic this one goes a step further by highlighting the scriptural and spiritual errors of Christian anti evolution It is to the surprise of no one impossible to deceive people about science without also deceiving them about scripture Evolution

And Ungodly Ways is a simple account of corruption put together with the hope of strengthening those who choose to walk a lighted path
