**Political Animals** Rick Shenkman, 2016-01-05 Can a football game affect the outcome of an election What about shark attacks Or a drought In a rational world the answer of course would be no But as bestselling historian Rick Shenkman explains in Political Animals our world is anything but rational Drawing on science politics and history Shenkman explores the hidden forces behind our often illogical choices Political Animals challenges us to go beyond the headlines which often focus on what politicians do or say they'll do and to concentrate instead on what's really important what shapes our response Shenkman argues that contrary to what we tell ourselves it's our instincts rather than arguments appealing to reason that usually prevail Pop culture tells us we can trust our instincts but science is proving that when it comes to politics our Stone Age brain often malfunctions misfires and leads us astray Fortunately we can learn to make our instincts work in our favor Shenkman takes readers on a whirlwind tour of laboratories where scientists are exploring how sea slugs remember chimpanzees practice deception and patients whose brains have been split in two tell stories The scientists' findings give us new ways of understanding our history and ourselves and prove we don't have to be prisoners of our evolutionary past In this engaging illuminating and often riotous chronicle of our political culture Shenkman probes the depths of the human mind to explore how we can become more political and less animal

**Evolution** , *It's Only a Bubble* Dr. Andreas Zachariou,2015-02 It s Only a Bubble aims at the liberation of man from his conviction that he suffers because he is inherently sinful The traditional religious idea that man fell from the state of perfection that he was made by God is replaced by the idea that man was made perfect in the core field but he was simultaneously placed in the dimensions for gaining perfection also by free choice Man moves up the dimensions by evolving which is achieved by growing over obstacles Obstacles are not punishments by God but stimulation for growth God does not interfere directly because He wants man to act so that he can grow Help is not offered as a result of faith or prayers but is embedded in the creation and is released automatically as one grows The author walks the readers through the process of facing obstacles including overwhelming events like death He also identifies the benefits of moving up the steps of spiritual evolution and describes how formal education can become meaningful if it s finally made an integral part of growth
