**Writing the Past** Gavin Lucas,2018-11-21 How do archaeologists make knowledge Debates in the latter half of the twentieth century revolved around broad abstract philosophies and theories such as positivism and hermeneutics which have all but vanished today By contrast in recent years there has been a great deal of attention given to more concrete practice based study such as fieldwork But where one was too abstract the other has become too descriptive and commonly evades issues of epistemic judgement Writing the Past attempts to reintroduce a normative dimension to knowledge practices in archaeology especially in relation to archaeological practice further down the assembly line in the production of published texts where archaeological knowledge becomes most stabilized and is widely disseminated By exploring the composition of texts in archaeology and the relation between their structural performative characteristics and key epistemic virtues this book aims to move debate in both knowledge and writing practices in a new direction Although this book will be of particular interest to archaeologists the argument offered has relevance for all academic disciplines concerned with how knowledge production and textual composition intertwine      *Interpreting Feyerabend* Karim Bschr,Jamie Shaw,2021-03-18 This

by the experimenters and they were following a schedule and a set of rules written by the experimenters The experimenters deceived the guards and made them believe they were not subjects They also borrowed many elements from a previous student experiment without disclosing this information in their reports The prisoners were not allowed to leave the experiment at will and they were conditioned by the experimenters The mock prison situation was unrealistic Most participants did not forget they were participating in an experiment and many responded to demand characteristics The data was not collected properly And the conclusions were pre written according to non academic aims This book goes beyond the experiment to provide ample background and context in order to understand how the experiment was planned financed recorded and divulged in the press and within the academic It discusses also the role played by Philip Zimbardo in the trial of one of the guards of Abu Ghraib as well as the impact of mass media on science the debates between personal psychology and social psychology and the specific nature of cold war social science
