Meet Jill Watson: Georgia Tech's first AI teaching assistant

Source: www.irs.gov, 2007-08-10. (The military budget)

Professor Ashok Goel recently gave a talk at TEDxSanFrancisco about the use of artificial intelligence to answer students' questions in the forums for his online Knowledge-Based Artificial Intelligence (KBAI) class. Dubbed Jill Watson, the AI teaching assistant was based on IBM's Watson platform, which is perhaps best known as the computer that beat two Jeopardy champions. Jill was developed specifically to handle the high number of forum posts by students enrolled in an online course that is a requirement for Georgia Tech's online master of science in computer science program.

Goel and a team of Georgia Tech graduate students began building Jill Watson last year. She began providing responses to student questions in January, and in his talk, Goel describes some of the early problems Jill experienced and what the team did to make her answers better.

Students in the course were unaware that Jill was not a real person. However, some students suspected that, because it was an AI course, it was possible that there was an AI in use in the forums. Goel tells the story about how students reacted upon learning that Jill wasn't human, which included a number of humorous responses that he shares in the full talk, which can be viewed [here](#).

kept alive during all the 15 or so months during which we organized TAKE 2019 That this edition of TAKE involves several entities linked with academia i e WU Vienna University of Economics and Business the Austrian Economic Chamber and the Institute for Applied Research on Skilled Crafts and Trades IAGF This in itself a big success and a sign of the Conference improvement Also we may see by analysing the papers and in particular the streams that TAKE has been following the economic times and this year we have several papers on the Gig Economy Only good conferences adjust the others get stuck in time And success in Conferences is about teams And in TAKE that team is indeed a very large group of people including the co chairs the local organizing team the material organizers Book of Abstracts and Proceedings the stream leaders and the paper reviewers without all these persons nothing could have been done And finally we had to depend on the authors and their willingness to work with us Without the work of these large dozens of devoted and skilled people TAKE 2019 would not have existed May I also mention that this time and with Florian s impulse and skill the organization of TAKE was improved in technological terms in short we became techno we used a website to deliver the mail list a website to receive the scientific material and another website to receive the fees All these were investments that eventually paid off and that will guarantee a more stable organization for TAKE in the future And we owe it to Florian However as the Human Resource Development part of TAKE and more than anyone Gary Mc Lean would remind us We are humans Eduardo and technology helps but in the end is attention to detail capacity to deal with the bizarre and to accommodate the weirdness making sometimes the impossible possible that differentiates a good conference made doing things right from an excellent conference based in doing the right things And on this last matter believe me we in TAKE are among the best in the world because apart from being outstanding scholars and good colleagues we are an amazing group of friends and friendship is the best way to turn good conferences into outstanding ones Many thanks from the heart and enjoy the Conference Eduardo Tom Conference Chair Universidade Europeia Lisbon July 2019 Lisbon Portugal
