Flynn, Kathryn Haynes, Maureen A. Kilgour, 2017-09-08 This volume addresses the need to integrate gender equality into business and management education and provides examples of leading initiatives illustrating how this can occur from various disciplinary and global perspectives Gender inequality has a long history in business schools and the workplace and traditions are hard to change Some disciplines remain resolutely gendered affecting both women and men and case materials on women leaders and managers are still rare The chapters provide conceptual and research rationales as to why responsible management education must address the issue of gender equality They also identify materials and resources to assist faculty in integrating gender issues and awareness into various disciplines and fields These include specific case

studies and innovations that assess or address the role of gender in various educational environments The book is designed to help faculty integrate the topic of gender equality into their own teaching and research and gain support for the legitimacy of gender equality as an essential management education topic This is the first book in a series on gender equality as a challenge for business and management education published with the Principles of Responsible Management Education PRME Working Group on Gender Equality

Pluralism or Universalism in International Copyright Law Tatiana Eleni Synodinou, 2019-10-24 In a world where powerful intermediaries like Google and Facebook are de facto regulators of the communication of copyright protected works the democratization of access to content has both substantially expanded the availability of new markets and dramatically increased copyright infringements Does this mean that the long sought ideal of a universal copyright regulation which would harmoniously combine effective protection of intellectual creations with public interest goals is a lost cause Taken together the contributions to this insightful and thoroughly researched book suggest that despite the prevailing labyrinthine mosaic of divergent national responses to fragmentation at international level the foundations of a universal approach can be found in the interaction of regional national and international copyright law instruments when responding to current and emerging technologies Emphasizing the adaptation of copyright law to the

needs of the information society this volume provides critical approaches by leading copyright scholars on whether pluralism or universalism is the appropriate path to follow for the development of international copyright law The authors deal with such issues and topics as the following the application of core copyright law principles worldwide authorship rights and exceptions in the international copyright acquis Internet copyright enforcement global collective management of copyright copyright contracts database and design rights intermediary liability the global reach of the U S Fair Use doctrine World Intellectual Property Organization s role and strategy in international copyright lawmaking and bilateral trade and investment agreements involving copyright Specific evolutions and emerging trends in national and regional digital copyright laws are analyzed and assessed as they have developed in the European Union the United States Canada and Australia as well as in several Asian and African countries Throughout attention is paid to compatibility with the Berne Convention the perceived core of copyright law in the international copyright acquis and the key question of the balancing of copyright law with fundamental rights from an international and comparative law perspective As a comprehensive analysis of how core copyright law concepts and principles function in today s fragmented copyright legal system this book has no peers Its detailed treatment of numerous specific instruments and regimes as well as its insightful approaches to the future of international copyright lawmaking will prove of immeasurable value to lawyers judges policy makers academics and researchers working in the field of copyright law

Social-Behavioral Modeling for Complex Systems Paul K. Davis, Angela O'Mahony, Jonathan Pfautz, 2019-04-09 This volume describes frontiers in social behavioral modeling for contexts as diverse as national security health and on line social gaming Recent scientific and technological advances have created exciting opportunities for such improvements However the book also identifies crucial scientific ethical and cultural challenges to be met if social behavioral modeling is to achieve its potential Doing so will require new methods data sources and technology The volume discusses these including those needed to achieve and maintain high standards of ethics and privacy The result should be a new generation of modeling that will advance science and separately aid decision making on major social and security related subjects despite the myriad uncertainties and complexities of social phenomena Intended to be relatively comprehensive in scope the volume balances theory driven data driven and hybrid approaches The latter may be rapidly iterative as when artificial intelligence methods

are coupled with theory driven insights to build models that are sound comprehensible and usable in new situations With the intent of being a milestone document that sketches a research agenda for the next decade the volume draws on the wisdom ideas and suggestions of many noted researchers who draw in turn from anthropology communications complexity science computer science defense planning economics engineering health systems medicine neuroscience physics political science psychology public policy and sociology In brief the volume discusses Cutting edge challenges and opportunities in modeling for social and behavioral science Special requirements for achieving high standards of privacy and ethics New approaches for developing theory while exploiting both empirical and computational data Issues of reproducibility communication explanation and validation Special requirements for models intended to inform decision making about complex social systems
