demonstrates that the harm is not just confined to undergraduate education but to many socio economic conditions in American society The Kingdom has contributed to a K 12 education system that sends too many students to college and prevents the resources needed for careers without a college education It shares some of the blame for the lack of skill and semi skilled labor in this country Coplin ends on a positive note by showing that some progress in transforming the Kingdom to an institution that serves its undergraduates has occurred but much more needs to be done He suggests three most important structural changes need to quicken the pace of change and contribute to rather than prevent equity and inclusion
